CARRER OBJECTIVE

Detail-oriented Software Developer with a strong foundation in Python, Django and Bootstrap. Passionate about developing dynamic web applications, backend development, and data-driven solutions. Eager to apply problem-solving skills and technical knowledge to real-world projects. Looking for an opportunity to contribute and grow in a collaborative software development environment

TECHNICAL SKILLS

- Programming Languages: Python
- Web Development: Django, Flask, HTML, CSS, Bootstrap
- Libraries & Frameworks: NumPy, Pandas
- Databases: SQLite, MySql
- Version Control: Git, GitHub
- Others: REST APIs, Object-Oriented Programming (OOP), Debugging

WORK EXPERIENCE / INTERNSHIP

Freelance Software Developer

- PG/Hostel Management System: Developed a Django-based web application for managing tenant information, room availability, and payment tracking. Implemented features like automated billing and notifications, enhancing operational efficiency.
- College Projects: Built Flask & Django web applications for college students, focusing on dynamic user interfaces, data processing, and performance optimization to meet project requirement

Web Development, AcmeGrade Pvt Ltd [IIT Bombay]

- Developed responsive and user-friendly web interfaces using HTML, CSS, and Bootstrap while ensuring cross-browser compatibility for a seamless UI/UX experience.
- Managed MySQL databases, optimizing website performance by handling data storage, retrieval, and integration with web applications.

PROJECTS

E-Commerce Website Using Django

Developed a responsive e-commerce website using Django, HTML, CSS, and Bootstrap. Implemented user authentication, product management, cart functionality, and a secure checkout system. Integrated MySQL for database management and an admin panel for order tracking and user management.

PG Management & Facility Showcasing Web Application

Built a web application for PG hostel management using Python, Django, HTML, CSS, and MySQL. Implemented tenant registration, room allocation, and rent management. Added marketing features like vacancy listings, tenant inquiries, and integrated images/videos to attract renters.

Recipe Web - Appliaction

Developed a Recipe Management system using Django and Python, implementing authentication and CRUD operations. Users can log in to view, add, remove, and update recipes. Demonstrated proficiency in database handling and user access contro
