☎ 6371704662

CAREER OBJECTIVE

To pursue a successful career through credible performance and diligence in work enabling an ever learning aspect of latest developments to me and putting my share contribution to the growth of the organization.

PROFESSIONAL EXPERIENCE

- **4 years of experience** in full-stack development, specializing in **Node.js** and **Express.js**, **TypeScript**
- Working knowledge of **Python**, **React.js**, and **JavaScript** for building robust, scalable web applications and services
- Lead development initiatives, tackle architectural challenges, and mentor junior team members as a **Senior Developer**
- Deep expertise in **performance tuning**, troubleshooting, and maintaining applications using the Node.js ecosystem
- Skilled in gathering requirements, identifying key features of complex problems, and defining effective technical solutions
- Proven ability to streamline business workflows through **third-party service integration** and **custom automation**
- Experienced in **performance analysis** and **system optimization** for scalable, efficient application deployment
- **Proficient in Artificial Intelligence (AI) concepts**, including **Machine Learning** model development and integration into applications
- **Hands-on experience** with AI tools such as **ChatGPT**, **DeepSeek**, **Claude**, and **Gemini** to automate workflows, enhance productivity, and build intelligent solutions

SOFTWARE SKILLS

Backend Technologies: Node.js, Express.js, Python

Frontend Frameworks & Languages: React.js, JavaScript

Databases: MongoDB (collections, documents, aggregation pipelines), MySQL, Redis

Machine Learning & AI Tools: Pandas, Numpy, TensorFlow, Scikit-learn, OpenAI (ChatGPT), DeepSeek, Claude, Gemini, Blackbox AI

Cloud & DevOps: AWS (EC2, Lambda, Auto Scaling, S3, CI/CD pipelines)

APIs & Integrations: REST APIs, Chatbot Development, Zoho CRM, MSG91, IVR Systems, Razorpay, GoDaddy

Tools & Platforms: Postman, Git, GitLab, VS Code, MongoDB Compass, MySQL Workbench, Docker, BullMQ, Kafka, Redis

WORK EXPERIENCE

- **ATIIT Pvt. Ltd.** – *September 2024 to Present*
- **Eztruck Logistics Services** – *July 2023 to September 2024*
- **InheritX Solutions Pvt Ltd** – *January 2021 to July 2023*

PROJECTS

PROJECT NAME: CRM + Accounting System (current)

This project involved the development of a **comprehensive CRM (Customer Relationship Management) and Accounting System** with a **tiered subscription model** to support businesses of all sizes. The platform helps in streamlining lead management, automating communications, tracking payments, and generating financial reports, all within a secure and scalable system. Built using the **MERN stack**, the system also integrates third-party services for notifications, authentication, and payments.

Key Features:

1. CRM Functionality

- Lead capture, status tracking, and automated follow-up workflows
- Role-based access for sales, support, and admin teams
- Lead history tracking with communication logs
- Automated email and real-time follow-up reminders via Firebase

2. Accounting Module

- Invoice creation and payment tracking
- Expense management and financial dashboards
- Monthly and yearly reports for revenue and transactions
- Razorpay integration for secure online payments

3. Authentication & Security

- OTP-based login using **MSG91** for phone and email verification
- Role-based access control for data security

4. Notifications & Alerts

- Real-time updates using **Firebase Cloud Messaging**
- Automated email alerts for leads, payments, and task reminders

5. Deployment & Hosting

- Deployed on **AWS EC2** for scalability and high availability
- Domain and SSL managed through **GoDaddy**

Subscription-Based Model

To accommodate different user needs, the platform offers three subscription tiers:

- **Free Plan**
- **Popular Plan**
- **Customised Plan**

Challenges Faced:

- Designing an intuitive and unified interface for both CRM and accounting users
- Building secure OTP-based authentication
- Integrating and managing third-party tools (Razorpay, Firebase, MSG91)
- Implementing a flexible, scalable subscription structure
- Ensuring performance and uptime on cloud infrastructure

Role & Responsibilities (as Team Lead):

1. Planning & Architecture

- Collaborated with stakeholders to define business goals
- Designed a modular and scalable MERN-based system architecture

2. Technical Development

- Developed React.js front-end with responsive design
- Created robust REST APIs using Node.js and MongoDB
- Integrated payment, notification, and OTP systems (Razorpay, Firebase, MSG91)

3. Subscription Management

- Designed and implemented the logic for free, popular, and customised plans
- Handled access control and feature toggling based on subscription level

4. Team & Project Management

- Led a team of developers, assigned tasks, and managed sprint deliveries

- Reviewed code and provided mentoring to ensure best practices

5. Deployment & QA

- Deployed the system on AWS EC2
- Conducted testing, resolved bugs, and optimized system performance
