ABOUT ME

Experienced UI/UX developer with 2.5 years in a corporate setting and 1.8 year working with Angular. Skilled in building dynamic websites and web applications, with a strong focus on clean, efficient code and user-friendly design. Passionate about expanding frontend development skills and delivering high-quality digital solutions.

WORK EXPERIENCE

NEKSS PVT.LTD. – Frontend Developer

2024-FEB-NOW

- Collaborated closely with senior developers to identify, troubleshoot, and resolve front-end issues, resulting in improved performance and user experience.
- Successfully contributed to the development and refinement of UI components, ensuring consistency with modern design principles and client branding.
- Maintained high levels of client satisfaction through responsive design adjustments, timely updates, and regular communication to align with evolving requirements.
- Optimized existing code by minimizing redundant scripts and improving page load times, enhancing overall application performance.
- Participated in cross-functional team meetings, contributing UI/UX insights that helped streamline development workflows and project timelines.

Algopage IT Solutions Pvt.Ltd. – Web Designer

2023-Aug – 2024-Jan

Began my professional journey as a WordPress Developer , where I..

- Developed and customized WordPress themes and plugins to meet diverse client needs across multiple industries.
- Worked extensively with jQuery to add dynamic, interactive elements that enhanced user engagement.
- Ensured fully responsive design across devices by implementing mobile-first strategies using HTML5, CSS3, and media queries.
- Improved website performance by optimizing front-end code and minimizing scripts.
- Collaborated with designers and backend developers to translate UI/UX wireframes into high-quality, functional websites.

PROJECTS

Hospital Management System (ERP)

- Designed and developed responsive UI pages for Hi-Tech Medical College's ERP system, focusing on core modules such as Student Management, Accounting, and Patient Care, using Angular Material, Bootstrap, and CSS to ensure clean, consistent, and mobile-friendly layouts.
- Collaborated with developers to ensure design-to-code accuracy, reviewing interfaces for consistency, usability, and cross-browser/device compatibility, while maintaining design integrity throughout the development process.

Canonfire Creatives – canonfirecreatives.com

Role: Front-End Developer | Tech: HTML5, CSS3, JavaScript, jQuery, Bootstrap, and PHP

- Built and customized the official website for Canonfire Creatives Pvt Ltd, aligning with the agency's branding and creative goals.
- Implemented interactive UI elements, responsive layouts, and smooth transitions using jQuery and CSS animations.
- Performed UI testing and ensured mobile responsiveness and browser compatibility across all pages.

eQuantX Pharma Consulting Website – equantx.com

Role: WordPress Developer | Tech: HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Developed an educational and community-focused site using Elementor for layout flexibility and mobile responsiveness.
- Implemented custom features with jQuery and styled layouts with CSS to match branding.
- Conducted cross-browser testing to ensure a consistent experience across all devices.

Gurujicn Educational Portal – Gurujicn.org

Role: Front-End Developer | Tech: HTML5, CSS3, JavaScript, jQuery, Bootstrap, and PHP

- Developed dynamic pages for courses and community updates using PHP.
- Built responsive layouts with Elementor and enhanced interactivity with jQuery and AJAX.
- Ensured mobile compatibility and performed UI testing for a consistent user experience.

Sai Consultants – saiconsultantss.co.in

Role: Wordpress Developer | Tech: HTML5, CSS3, JavaScript, jQuery, Bootstrap

- Contributed to structural and geotechnical engineering projects including buildings, bridges, roads, and water resources.
- Conducted soil exploration, lab testing, and prepared geotechnical reports for major infrastructure assignments.
- Supported structural design tasks, including drawings, calculations, and documentation using modern engineering tools.
