Profile

I'm a software developer with Proficient in java fullstack programming language and passionate about creating innovative solutions, Strong problem-solving abilities, collaboration skills, and a commitment to staying up-to-date with industry trends.

Education

08/2020 – 08/2023 Bhubaneswar, India	B.Tech(Computer Science) , (College of Engineering Bhubaneswar BPUT odisha) - 74 %
06/2017 – 06/2020 Bhubaneswar, India	Diploma(Mechanical Engineering), KIIT Polytechnic, (State Council for Technical Education & Vocational Training) - 72.89%
04/2017 Bhubaneswar, India	Class-X , Saraswati Sishu Vidya Gyan Mandir, Niladri Vihar - 60.88%

Skills

Programming languages (Java, Python, C++, JavaScript)

Web development (HTML, CSS, front end and back-end frameworks) • **WordPress**

Databases (SQL, MySQL) • **Other computer skills** - (MS Word, Excel, Power Point)

Adobe (ADOBE PAGE MAKER, ADOBE PHOTOSHOP) • **Corel Draw** • **Problem Solving**

Time Management

Projects

SCHOOL MANAGEMENT SYSTEM

- The student school management is an automated version of manual student school management system.
- It can handle all details about a student.The detail include School details, subject details, student personnel details, academic details, exam details etc

LIBRARY MANAGEMENT SYSTEM

- Library Management System in which you can perform all CRUD operations, in addition to advanced search, book issuing, Serialization and Deserialization.
- Management systems mostly use software across all schools and colleges to keep record of data. One such System is Library Management System, which is used to keep record of books present in a library.
- These Systems comprises of information regarding Books, where we can perform all the operations that are required in an actual system such as CRUD operation, advanced search, book issuing, and also to store the information within files using the process known as Serialization.

HOSPITAL MANAGEMENT SYSTEM

- Hospital Management System Project in Java and MySQL with source code. This project is great for those at an intermediate level in Java who want to advance their coding skills. In this project, the users will be able to perform the following functionalities Admin Login, Patient details, Doctor details, Room details, and Services.

EMAIL APPLICATION IN JAVA

- we have created a simple Email Application in Java with Swing and the JavaMail API. Email is an essential part of communication, allowing us to easily send messages and documents to people all over the world.
- The JavaMail API is a library that provides a platform-independent and protocol-independent framework to build email applications in Java. We will use this API to send emails from our application. The sender will be able to send a message and any type of file as an attachment to the receiver.

Courses

05/2023 – 05/2024
Bhubaneswar, India

Java Full Stack Development, QJSpiders

- CORE JAVA (Introduction to Java syntax, data types, control flow, functions, and basic object-oriented programming principles.)
- SQL
- J2EE (In-depth study of advanced Java features, design patterns, and best practices for scalable and maintainable code.)
- Java Web Development with Servlets and JSP (Web application development using Java Servlets and Java Server Pages (JSP), including handling HTTP requests, session management, and MVC architecture.)
- WEB TECHNOLOGY(html, css, java script)
- FRAMEWORK (spring, hibernate)

05/2022 – 07/2022
Bhubaneswar, India

Programming Essentials in Python (PCAP), Python Institute (PI)

- I have learned the universal concepts of computer programming like variables, flow control, data structures, algorithms, conditional, execution, loops, functions, developer tools and the runtime environment
- the syntax and semantics of the Python language;
- the fundamentals of object-oriented programming and the way they are adopted in Python;
- the means by which to resolve typical implementation problems
- the writing of Python programs using standard language infrastructure
- fundamental programming techniques, best practices, customs and vocabulary, including the most common library functions in Python 3.
