PROFILE

An adept frontend developer with **1.7 years** of mastery in **Next.js, React, HTML, CSS, Tailwind and Material UI**, complemented by a robust understanding of **Express.js** for backend development. Proficient in creating responsive web pages for diverse devices and screen sizes. Collaborative and innovative, I've successfully led cross-functional teams to deliver high-quality web applications. Additional expertise includes backend technologies like Express.js, along with database proficiency in **MongoDB and MySQL**. Passionate about continual learning, I ensure cutting-edge solutions that surpass client expectations.

EDUCATION

Master in Computer Application

Indira Gandhi Institute of Technology (IGIT)

2020 – 2022

Dhenkanal, India

PROFESSIONAL EXPERIENCE

Software Developer Engineer-1

HyScaler

2022 – present

Bhubaneswar, India

Role:-Full stack developer

Frontend Wizardry (Using Next.js and tailwind)

- **Docker Environment Utilization:** - Employed Docker to establish a containerized environment for the project, ensuring consistency across different development and deployment stages.
- **Design Implementation:-** Executed design implementation using fundamental HTML, Tailwind CSS, and custom styles, creating an intuitive and visually appealing user interface.
- **GraphQL Integration:-** Integrated GraphQL to seamlessly retrieve data from the backend, optimizing data fetching capabilities for enhanced project functionality.
- **State Management:-** Implemented state management techniques to efficiently control and manage the application's state, ensuring a smooth and responsive user experience.
- **Component Design:-** Designed modular and reusable components, contributing to a more maintainable and scalable React project.
- **Dynamic Routing:-** Implemented dynamic routing to enhance navigation and provide a more interactive and user-friendly experience within the application.
- **Form Management:-** Developed robust form management systems, facilitating user input, validation, and submission for an improved form-handling experience.
- **Page Handling:-** Implemented effective page handling strategies, optimizing the structure and organization of pages within the project.
- **Props-Based Data Handling:-** Utilized props for efficient data handling, ensuring seamless communication between components in the React application.
- **Data Server-Side Rendering:-** Implemented server-side rendering for data, optimizing performance and providing faster initial page loads.
- **Page Performance Improvement:-** Employed optimization techniques to improve overall page performance, resulting in a more responsive and efficient application.
- **Proper Implementation of Hooks:-** Implemented React hooks effectively, ensuring proper usage and adherence to best practices for optimal functionality.
- **Authorization Permissions:-** Implemented permission systems to grant authorized individuals the necessary access for their designated activities within the application.
- **Chunk Files and Bundles Management:-** Managed chunk files and bundles effectively, optimizing the loading process and contributing to a more streamlined application structure.
- **File Size Management:-** Implemented file size management strategies, optimizing assets and resources to maintain a balanced and efficient project size.

Backend Wizardry(Express.js,MySQL,MongoDB)

- **Model Design:** Designed models to establish a structured and efficient data schema within the Express.js backend, utilizing MySQL as the relational database and TypeORM for seamless interaction.
- **GraphQL Implementation:** Integrated GraphQL to create dedicated endpoints for querying and mutating data, enhancing the flexibility and efficiency of data retrieval in the Express.js backend.
- **Controller Function Development:** Developed controller functions corresponding to each GraphQL query and mutation, ensuring a modular and organized approach to handling various operations within the backend.
- **Data Retrieval from External Backend:** Implemented endpoints to efficiently retrieve triggered data from another backend source, enhancing the integration capabilities of the Express.js application.
- **Resolver Design:** Designed and implemented resolvers to connect and orchestrate the flow of data between the GraphQL schema and the underlying data models, ensuring coherent and accurate responses.
- **Middleware Implementation:** Integrated middleware to handle various aspects of request processing, enhancing the security, and functionality of the Express.js backend.
- **Route Configuration:** Utilized routes to organize and structure the Express.js application, providing a clear and intuitive mapping of endpoints to corresponding controller functions and middleware.

Backend Wizardry(Laravel,MySQL)

- **GraphQL Integration:** Integrated GraphQL into the Laravel backend to establish dedicated endpoints for querying and mutating data, enhancing the flexibility and efficiency of data retrieval.
- **Resolver Function Development:** Developed GraphQL resolver functions corresponding to each query and mutation, ensuring a structured and organized approach to handling various operations within the Laravel backend.
- **Data Retrieval from External Backend:** Created endpoints to efficiently retrieve triggered data from another backend source, enhancing the integration capabilities of the Laravel application.

Junior Technical Engineer

HyScaler

Role:-Full stack Developer

05/2022 – 05/2023
Bhubaneswar, India

Asset Management (In house project:Using React.js and tailwind):-

- **Design Implementation:** Executed design implementation using fundamental HTML, Tailwind CSS, and custom styles to create an aesthetically pleasing user interface.
- **GraphQL Integration:** Incorporated GraphQL to efficiently retrieve data from the backend, enhancing data fetching capabilities within the React project.
- **State Management:** Implemented state management techniques to effectively handle and control the application's state, ensuring a seamless user experience.
- **Component Design:** Crafted well-designed components to enhance modularity and reusability throughout the React application.
- **Dynamic Routing:** Implemented dynamic routing to enable smooth navigation and a more interactive user experience within the application.
- **Form Management:** Developed robust form management systems to facilitate user input, validation, and submission, ensuring a reliable and user-friendly form experience.
- **Props-Based Data Handling:** Utilized props for efficient data handling, allowing for the seamless transfer of information between components within the React application.
- **Simple Hook Management:** Managed hooks effectively, ensuring their proper implementation and utilization for streamlined functionality within the React project.
- **Swiper Integration:** Integrated a Swiper component to enhance the visual design and interactive aspects of the application, providing an engaging and dynamic user interface.

- **Docker Environment:**Utilized Docker to create a containerized environment for the React project, streamlining deployment and ensuring consistent development across different environments.

SKILLS

Programming Languages:

C ,Javascripts

Web Technologies:

HTML , CSS, Tailwind, Material UI,React,Next

Database

My SQL,MongodB

Version Control and Deployment:

Git ,Docker
