Objective

Aspiring software engineer and recent MCA graduate with a solid foundation in software development, eager to grow within a dynamic organization. I am enthusiastic about leveraging my expertise in HTML, CSS, JavaScript, Oracle SQL, and Java to create innovative solutions and enhance user experiences while contributing to impactful projects.

Education

2022–2024 **Master in Computer Applications(MCA)**
Capital Engineering College, Bhubaneswar, Odisha

2019–2022 **Bachelor of Science(BSc)**
New Star Degree Science College, Khordha, Odisha

Technical Skills

- HTML**
 - Implemented semantic and non-semantic tags for styling and structure. properties.
 - Developed forms with validation and structured data using lists and tables. Integrated media and hyperlinks for dynamic content and navigation. Proficient in using HTML tags and attributes to create creative, functional web pages.
- CSS**
 - Good understanding of selectors, types of CSS, and various properties needed for styling.
 - Knowledge of position & display properties for applying styles.
 - Familiar with multimedia, position, and transform properties.
 - Applied basic CSS animations and transitions to create smooth interactive effects
- Java Script**
 - Utilized JavaScript keywords, datatypes, and operators for data handling and processing.
 - Developed functions and managed objects, arrays, and strings efficiently.
 - Implemented BOM features and manipulated the DOM for dynamic user interaction.
 - Employed Promises with async/await for streamlined asynchronous operations.
- Oracle SQL**
 - Good understanding of RDBMS concepts such as datatypes.
 - Solid understanding of SQL joins and SQL statements.
 - Excellent knowledge of writing queries.
 - Familiar with SQL concepts like group by clause, subqueries, functions, and operators.
- Java**
 - Proficient in core Java fundamentals including variables, data types, operators, and control flow.
 - Experience with OOP concepts(inheritance, polymorphism, abstraction, and encapsulation).
 - Familiar with JSP and Servlets, and have basic knowledge of database connectivity using JDBC.
 - Knowledge of Hibernate, Spring, and Spring Boot for building scalable Java applications.
- ReactJS**
 - Proficient in building dynamic and responsive user interfaces using React.js.
 - Experienced in using components, props, and state management for efficient UI development.
 - Familiar with React Router for seamless navigation and routing in single-page applications.
 - Knowledge of integrating REST APIs and managing application state using hooks and context API

Projects

2024 **Online Doctor Appointment Booking System**

Developed an Online Doctor Appointment System to automate the appointment booking process. The system manages doctor schedules, patient details, and bookings while reducing manual workload and ensuring secure data storage. It features modules like Admin Login and Patient Appointment.

Soft Skills

Problem-Solving	Skilled at identifying issues and developing effective solutions in a timely manner.
Adaptability	Able to quickly adjust to new environments, technologies, and challenges.
Critical Thinking	Capable of analyzing situations logically to make informed decisions.
Collaboration	Enjoy listening to various genres, which provides relaxation and a source of inspiration.

Languages Known

Odia	Advanced
Hindi	Advanced
English	Advanced

Declaration

I consider myself familiar with above specified aspects. I hereby declare that the information furnished above is true to the best of my knowledge.
