Career Objective:

Two years of experience in Software development. Extensive working experience in React. Utilize my technical and creative skills to develop and maintain responsive, user-friendly, and visually appealing websites. As a team member, willing to contribute my skill set to face daily challenges with fellow team members.

Key Skill:

Proficient knowledge in **Redux** which is used for state management, and **React Router** is for navigation. Developed UI by using **React** and backend by **NodeJS**. Proficient knowledge of **Webpack**, and **Babel**. Proficient at collaborating effectively with Back-end developers. Utilized **HTML**, **CSS** and **JAVASCRIPT** to create responsive Landing Pages.

Technical Skills:

- **HTML5**
- **JavaScript ES6**
- **Zustand**
- **Node js**
- **Jest**
- **Git**
- **Figma**
- **CSS3**
- **Bootstrap**
- **Tailwind**
- **JSON**
- **Firebase DB**
- **MongoDB**
- **Express.js**

Education:

Master in Computer Application from Silicon Institute of Technology, Bhubaneswar, Odisha in 2019 with 8.1 CGPA.

Professional Experience:

Frontend Developer, March2024-Present

Sobeit Technology Pvt Ltd-Cuttack, Odisha, India

Client-Bakeshake

Description: The project aimed to improve customer experience with a user-friendly interface for browsing products, placing orders, and managing customer accounts. Collaborated closely with stakeholders to collect and comprehend the UI requirements.

Responsibilities:

- Worked as a frontend developer of responsive and dynamic user interfaces using React.js, implemented Redux for efficient state management, and utilized **React Router** for seamless page navigation.
- Integrated **RESTful APIs** to retrieve and showcase bakery products, customer details, and order information.
- Added functionality for users to write reviews and rate products. User reviews and average ratings are displayed on product pages.

Junior Web Developer, Feb2023- Feb2024

Raising Web Solutions-Noida, India

Client-Rajkotdentist

Description: This application is designed for the city dental hospital in Rajkot to provide easy access to services and reduce the administrative burden on the hospital staff. It automates processes such as appointment scheduling, billing, and record management.

Responsibilities:

- Building a user-friendly dashboard for doctors to manage appointments, access patient records, and update treatment plans.
- Utilize frameworks like **Bootstrap** to ensure the app's components are responsive and adapt to different desktops, tablets, and smartphones.
- Properly handle data fetching and state updates for features like appointment scheduling and live notifications.

Hobbies:

- Creating Personal Projects
- Learning New Technologies
