

RAMACHANDRAN N

JAVA FULL- STACK DEVELOPER

6382430359 ramadithi1622@gmail.com 37, Abirami Nagar, Urapakkam, Chennai.

Objective

I am eager to take on a dynamic role as a full-stack Java developer, leveraging my 1.5 years experience to contribute to the development of scalable and robust software solutions. I am dedicated to producing high-quality code and thrive on collaborating seamlessly with cross-functional teams to ensure successful project outcomes. I am actively seeking a challenging opportunity where I can enhance my skills and make a meaningful impact.

Proficiency In :

Javascript

HTML

CSS

Springboot

Hibernate

Mysql

Oracle

JQery

Git

Maven

Jenkins

Angular

Eclipse

Profile Snapshot

- Java Full Stack Developer with **1.5 years** of experience in designing and developing robust web applications using Java technologies.
- I possess a comprehensive skill set that spans both front-end and back-end technologies, showcasing my ability to develop complete web applications.
- My expertise includes leveraging the Spring Framework, including **Spring Boot**, **Spring MVC**, and Spring Security, to create secure and modular applications efficiently.
- On the front-end, I am proficient in JavaScript and well-versed in popular libraries such as **Angular**, allowing me to build dynamic and responsive user interfaces.
- I excel in crafting visually appealing designs using **HTML** and **CSS**, ensuring a clean and engaging user experience.
- In terms of backend development, I have a deep understanding of designing and implementing RESTful APIs, facilitating seamless communication between front-end and back-end components.
- My database expertise extends to both SQL **MySQL**, (**MongoDB**) databases, enabling efficient data storage solutions.
- I am well-acquainted with version control systems like **Git**, ensuring collaborative development and effective code management. Additionally, my knowledge includes deploying applications using tools like **Docker** and establishing Continuous Integration/Continuous Deployment (CI/CD) pipelines for automated builds and deployments.
- Overall, my skill set covers the entire spectrum of web application development, from designing visually appealing interfaces to implementing robust back-end solutions and ensuring smooth deployment processes.

Job Exposure

KKS Tech Solutions Private Limited

Bangalore

June 2022 - Till Date

Graduation

B.E-COMPUTER SCIENCE ENGINEERING

VRS College of Engineering and Technology

6382430359

E-Commerce / HauteLook

June 2022 - Present

As a Java Full Stack Developer at HauteLook, I played a pivotal role in enhancing and optimizing the member-only shopping platform, contributing to its success in delivering seamless flash-sales and limited-time events. The project involved end-to-end development and maintenance of the platform, ensuring a responsive and engaging user experience.

Key Contributions**Frontend Development:**

- Implemented dynamic and interactive user interfaces using **Angular**, **HTML**, and **CSS**, ensuring a modern and responsive design.
- Collaborated with UX/UI designers to enhance the overall user experience, incorporating intuitive navigation and aesthetically pleasing layouts.

Backend Development:

- Developed robust RESTful APIs using **Java** and **Spring Boot**, enabling efficient communication between the frontend and backend systems.
- Integrated secure payment gateways and order processing functionalities to streamline the purchasing process.

Database Management:

- Designed and optimized database schemas using **MySQL** to handle large-scale product catalogs and user data.
- Implemented database indexing and caching strategies, resulting in significant improvements in query performance.

Security and Authentication:

- Implemented OAuth2 authentication for secure member access and authorization, enhancing the overall platform security.
- Conducted regular security audits and implemented encryption protocols to protect sensitive user information.

Continuous Integration and Deployment:

- Established CI/CD pipelines using **Jenkins** and **Docker**, automating the deployment process and ensuring a quick turnaround for new features and bug fixes.
- Implemented unit testing and participated in code reviews to maintain code quality and minimize errors.

Collaboration and Agile Development:

- Worked closely with cross-functional teams, including product managers and QA engineers, in an Agile environment to meet sprint goals and project timelines.
- Actively participated in sprint planning, daily stand-ups, and retrospective meetings to foster a collaborative and efficient development process.

Declaration

I hereby declare that the information stated above is true to the best of my knowledge and belief..
