Education:

- MCA (2020-2022) (Odisha University Of Agriculture & technology) – 7.3 CGPA
- B.Sc. (2017-2020)(Utkal University) – 7.81 CGPA

Internship:

- Broadmind Lab Pvt. Ltd (29/10/2022 to 29/01/2023)Role: QA tester
- I tested the www.broadmind.io site in manual testing and I test also in automation testing by Selenium IDE and also tested other pages of that website.
- PHN Technology (01/05/2023 to 31/05/2023)Role: Manual tester
- I tested the phn career.apk application in manual mode and I test another application phn connect.apk in manual mode and we make many test cases and testscenarios for test that application .
- Polosoft Technology (01/09/2023 to 31/11/2023)
Role: Manual Tester
I tested that product that they made “Bright Directories” manually and find some bug and error.They solve that error and fix that bug.

Key Projects:**1. Adactin -Manual Testing**

Description:

Using this system users can view and check for various rooms available and simultaneously book themby making online payments via credit card. The system calculates the total cost of booking the services. Once the user makes the payment, the system will provide an online receipt to the user. Users can view the room booking in an effective graphical user interface. Since room bookings will be displayed in an effective graphical user interface users will get to know which rooms are booked and how many rooms are available for booking. Using this application users can select the room according to their preference.The rooms which are already will be disabled and for the rooms which are available users just must select them and then proceed to the payment option. Once the user makes the payment system will generate a receipt and it will be sent to the respective user’s email id and it will be reported to the admin, when a uservisits the hotel, he must show the receipt for the accommodation.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the Project.
- Identified Test Scenarios required for testing
- Prepared and Executed Test Cases as per System Requirements.
- Defect Reporting and Tracking using Bugzilla

- Test Management (Test Case Execution and Defect Reporting).
- Extensively performed Manual Testing process to ensure the quality of the software.
