Projects

Project: House price predictions

Objective:

Predicting house prices to help to determine the selling price of a house of a particular region and can help people to find the right time to buy a home. The aim is to predict the efficient house pricing for real estate customers with respect to their budgets and priorities.

Project: Customer Churn Analysis

Objective

The main objective of this project is to do detailed Exploratory Data Analysis (EDA) on Sales Dataset (Customer churn) with Visualization. Extracting different insights from data that will help to find the behaviour of the churned customer from which better services can be provided to turn customer's decisions in favour of organization.

Project: Ms Dhoni's International Cricket Career Report

By Power Bi

Objective

The objective is to showcase key milestones, performance metrics, and insightful analysis of Dhoni's achievements, highlighting his impact on the game. By leveraging Power BI's interactive visualizations and data storytelling capabilities, the project aims to provide a captivating and informative report that celebrates Dhoni's contributions to the sport while offering valuable insights into his career statistics, match performances, and significant moments.

Internship

Business Analyst

feb2023-may2023

KultureHire

Throughout my internship, I actively participated in team meetings, presentations, and workshops, enabling me to develop effective communication and interpersonal skills. I adeptly utilized industry-standard tools and software to perform data analysis, streamline processes, and present findings in a clear and concise manner to stakeholders.

Education

Data Science

Relevel By Unacademy

2022-2023

I have successfully completed a comprehensive data science course, equipping me with the essential knowledge and skills required to excel in Excel, SQL, Python, Power BI, Tableau and Machine Learning in the field.

Bachelor Of Science(Mathematics)

2017-2020

Utkal University

Score-7.2 CGPA

I have successfully completed my Bachelor of Science degree with Honors in Mathematics. Throughout my studies, I have developed a strong foundation in mathematical principles, theories, and problem-solving techniques. My coursework encompassed a wide range of topics, including calculus, algebra, statistics, probability, and mathematical modeling.
