

Rakesh Rout

Data Scientist & AI/ML Engineer

Highly motivated and results-oriented data scientist with a passion for leveraging machine learning, deep learning, and natural language processing (NLP) techniques to solve complex AI/ML challenges. Proven ability to collect, analyze, and interpret large datasets to extract meaningful insights and drive informed decision-making. Eager to apply expertise in face swapping, video validation, video concatenation, and data annotations to enhance AI/ML outcomes.

WORK EXPERIENCE

Data Science Intern Awone.ai

12/2022 - 05/2023

Hyderabad, India

Awone is an Applied Sciences Company "Accelerating AI Journey".

Achievements/Tasks

- **Data Annotation:** Proficient in using Computer Vision Annotation Tool (CVAT) to annotate images and videos for object detection, classification, and segmentation.
- **Data Preprocessing:** Orchestrated data preprocessing pipeline for computer vision tasks, encompassing image resizing, normalization, and data augmentation techniques; boosted machine learning model performance by 5% through improved data quality and consistency.
- **Face Swapping:** Implemented SimSwap, a deep learning-based face swapping tool, to generate realistic and high-quality face-swapped images for character creation in betting games; resulted in a 30% increase in player engagement.
- **Character Generation:** Generated multiple new characters for betting games (Teenpati, DragonTiger, etc.) using face swapping techniques and images from <https://this-person-does-not-exist.com> and real dealers.

Contact : Vamsi Bhandaru - CEO - Awone.ai

EDUCATION

Master Program In DataScience GUVI GEEK NETWORK PRIVATE LIMITED (IITM) | Chennai

2021 - 2022

BSc. | Physics

Utkal University | Bhubaneswar

2020

12th Boards | CHSE | PCM

Maharishi College Of Natural Law |
Bhubaneswar

SKILLS

Programming Languages: Python, SQL

Machine Learning Libraries: TensorFlow, scikit-learn

Classical Machine Learning: Linear Regression, Logistic Regression, random Forest, XgBoost

Deep Learning Techniques: Convolutional neural networks (CNNs), recurrent neural networks (RNNs)/LSTM/GRU, ResNets

Natural Language Processing (NLP): Text classification, sentiment analysis, Word2Vec, NLTK, Spacy,

Genai, LLM, OpenAI API, LangChain, HuggingFace, Vector Database, Pinecone & ChromaDB

Data Preprocessing: Exploratory Data Analysis (EDA), Feature engineering

Machine Learning Model Development: ML Model Training

Data Annotation Tools: Labelling, CVAT, VGG Image Annotator

PERSONAL PROJECTS

[MCQ Generator from {custom data} using OpenAI, Langchain]

- <https://github.com/Racasekumar/mcqgen.git>
- This project harnesses the power of OpenAI's GPT-3.5-turbo language model and the flexibility of Langchain to create custom-tailored MCQs from any text source.
- Combine OpenAI's language prowess and Langchain's flexibility to generate tailored questions and answer choices that precisely match your learning objectives.
- It takes text input, subject matter, desired tone, and a sample response format as guidance to generate high-quality, diverse MCQs.
- The generated questions are then expertly reviewed and refined to ensure clarity, accuracy, and alignment with the target audience's cognitive abilities.

[Quora Question Pairs Similarity] [NLP - Project]

- <https://github.com/Racasekumar/Quora-Duplicate-Question-Pair-.git>
- Predicting Similarities between two question Pairs
- Developed this project using NLP and ML Classification Algorithms
- Got an Accuracy of approx 80%
