PROJECT

Natours Project

This is a Fictional Company which provide Tour package . This made using **HTML , CSS** with good design and animated with fully responsive. Also use **SASS** to organize and reuse the code and also plan to take further implement backend to make dynamic this project.

Hotel Booking Website

The Hotel Booking Website is a web application developed using the MERN (**MongoDB, Express.js, React.js, Node.js**) stack. The purpose of this website is to allow users to search and book hotel rooms online. It provides a user-friendly interface for browsing available hotels, viewing room details, checking availability, and making reservations.
