WORK EXPERIENCE

Accenture - Pune

Associate Software Engineer

Aug 2024 - Present

- Developed applications for 2 BFSI projects: Loan Originating System and Collateral Management System where in Frontend, I helped in **designing scalable folder structure** and built **reusable global components** that significantly **reduced code duplication by 35%**.
- Built scalable microservices using **Django**, exposing **REST APIs** and using **gRPC** for inter-service communication, orchestrated with **Kubernetes**, backed by MySQL, MongoDB, and Elasticsearch, supporting 100K+ Daily active users.
- Collaborated with backend teams working on Spring Boot services to integrate secure APIs and database-driven workflows. Implemented backend optimizations and automated data aggregation pipelines, improving system throughput, **reducing manual intervention**, and **lowering average response latency by ~15%**.
- Participated in enterprise Data Governance initiatives, **implementing data validation rules**, lineage tracking, and role-based access controls, ensuring AI-ready datasets with traceability, integrity, and compliance for regulated BFSI environments.

Accenture - Bangalore

Software Engineer Intern

March 2024 - June 2024

- Built and maintained 3 full-stack production applications using **React.js** and **Node.js**, ensuring responsiveness and cross-browser compatibility, and **implemented SEO-friendly architecture**, **increasing site traffic by 15%** and **contributing to a 12% revenue boost**.
- Developed **RESTful APIs** using Django REST Framework and containerized applications using Docker for AWS deployment.
- Engineered a real-time analytics dashboard using **React** and **WebSockets** for live updates, integrating with Node.js backend services that utilized Apache Kafka to stream and aggregate **data from 5 different sources**.

CERTIFICATIONS AND ACHIEVEMENTS

- Solved 350+ problems across LeetCode, GeeksforGeeks, and HackerRank | 5 Star coding proficiency**
- Earned the “Emerging Leader” award at previous organization for taking ownership in project execution.**
- Published research paper in IEEE Hyderabad conference.**
- AWS Certified Cloud Practitioner**
- Microsoft Certified: Fabric Data Engineer Associate**

PROJECTS

Loan Originating System

- Developed a responsive and scalable front-end using **React with TypeScript**, **building custom, reusable components** with Ant Design and **implementing React Hook Form** for efficient form handling and validation, ensuring strong type safety.
- Integrated **RTK Query with GraphQL** for efficient API communication and caching, worked with **gRPC-based services** written in Django for secure, **low-latency internal communication** and managed **data using MongoDB and SQL Server**.
- Wrote comprehensive unit tests using Jest, and integrated SonarQube into the CI pipeline to **automate code quality checks**.

Collateral Management System

- Migrated a legacy application from Angular to React.js, **optimized SQL/NoSQL queries** and indexing, implemented Redis-based caching, and deployed containerized services using Docker on AWS, **achieving a 15% reduction in server infrastructure costs**.
- Created a fuzzy matching algorithm to detect duplicate addresses across heterogeneous formats, **reducing duplicate records by 20%**.
- Coded critical modules and Implemented security measures such as JWT-authentication, **role-based access control (RBAC)**, etc.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering (Data Science)

(2024)

Shri Ramdeobaba College of Engineering and Management, Nagpur

SKILLS

- Programming Languages:** Python, SQL, C/C++, Java
- Frontend:** HTML, CSS, Typescript, (ES6+), React Js, Redux, RTK Query, Apollo Client, Jest, Tailwind CSS, Webpack
- Cloud & Tools:** AWS, Microsoft Azure, Databricks, Docker, Kubernetes, Git, JIRA
- Backend:** Django, Node.js, Express.js, REST API, GraphQL, Firebase, Microservices, gRPC
- Big Data:** Apache Spark, Hadoop
- Web Development:** HTML, CSS, MySQL, MongoDB
