- Business Problem Solving: Applied ML techniques for categorization and regression, managing data preparation and model application on industry-specific datasets.

Projects

Personal Portfolio | *HTML, CSS, JavaScript*

August 2024

- Created a single-page portfolio website with animated sections for skills, projects, and contacts, ensuring a visually compelling and user-friendly experience.
- Implemented a day/night toggle mode and interactive elements to enhance accessibility and engagement.
- Designed a responsive layout using media queries for optimal viewing across desktops, tablets, and smartphones.

Student Registration System | *HTML, CSS, JavaScript*

September 2024

- Built a dynamic student registration system with features to add, edit, and delete student records, ensuring data persistence using local storage.
- Implemented form validation to restrict inputs to valid data types and provided a clear display of student records with options for modification.
- Enhanced the system's visual appeal and usability with organized file structure, CSS styling, and comprehensive code documentation.
