Project Details

6 Weeks

Project Management

A project report summarizes a project's key aspects, including its goals, timeline, budget, progress, and outcomes. It provides project managers with critical information to monitor and evaluate the project's performance, identify potential risks and challenges, and communicate progress to stakeholders.

6 Weeks

GoEzy

People will use the app and select appropriate service from the option (example ??? cleaning, cooking, etc). The service provider will be registered locality wise (example 5 service provider for a radius of 5 kms) .When the customer requests the option / service, the alert will be activated to us in the corporate office through the app automatically for tracking purposes and we will allocate the same to the service provider / service partner in that locality based on their availability (Note that their availability will be known from the app only). The entire project management will happen through APP and no manual intervention is required.

4 Weeks

Batch Job Management

The project is based on the batch upload of the datas into the selected projects .This project is an inhouse project of the company.

6 Weeks

YoDr.

The purpose of the Clinic management system is to maintain the records of the patient including patient medical reports, appointment booking and cancellation, patients invoices, generating prescription, billing and report generation and send an alert to patient as well as doctor about appointments
