Development Tools	Jira, Postman, Visual Studio Code, Git, GitHub, Chrome DevTools, Figma, Slack, npm.

EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER ThoughtSpheres Technologies Pvt. Ltd.	Jan 2023 - Present <i>Bhubaneswar,Odisha</i>
• Develop and maintain responsive user interfaces using React.js, ensuring optimal performance and user experience. • Manage state efficiently with Redux, integrating dynamic data from RESTful APIs and other services. • Collaborate with backend developers to create cohesive, seamless user experiences across all devices . • Test, debug, and optimize applications for cross-browser compatibility and responsiveness to improve performance.	

PROJECTS

Hiresure AI. Developed Hiresure AI, a SaaS-based Generative AI recruitment platform that automates the entire hiring process—from job description creation to candidate matching. HR teams can create JDs, post them on hiring platforms with a unique resume submission URL, and let the system identify top matching profiles. The platform also generates detailed candidate insights (Kundli) for better hiring decisions. This AI-driven solution streamlines recruitment workflows, reduces time-to-hire by 30%, and enhances efficiency through seamless job posting, profile matching, and data-driven candidate evaluation. ([Try it here](#))

Infra Ecosphere . Developed a comprehensive Human Resource Management System (HRMS) that optimized workforce management for labor projects, reducing administrative time by 30%. Streamlined key functions such as attendance tracking, payroll processing, leave management, and performance evaluation, ensuring full compliance with labor laws. Enhanced productivity by providing real-time data access, improving decision-making speed by 25%. Contributed to code review and optimization, improving software efficiency by 15%, and actively participated in agile development, accelerating feature deployment by 20%. ([Try it here](#))
