

SUMMARY

Highly skilled Python Developer with 3.4 years of overall experience and 2.9 years of relevant experience in developing and maintaining complex web applications. Experienced in writing custom Python scripts to extend Django applications, collaborating with other developers, and integrating third-party services and APIs. Achieved significant increases in user engagement, revenue, and application functionality, while reducing development time and improving overall code quality.

SKILLS

- Python Programming
- Object Oriented Programming
- Django Framework
- Flask Framework
- Rest API's
- MySQL
- PostgreSQL
- Git
- Dbsqlite3
- HTML5
- CSS3
- PyTest

EXPERIENCE

Python Software Developer

Ramboll India Pvt Ltd Aug 2023 - Oct 2024

Project : Hospital Management Web Application

Description:

In particular, this hospital management system project in Python Django focuses mainly on dealing with hospital records. Also, the system displays all the available appointments with their respective details. In addition, the system allows managing patients records. In an overview of this web application, a patient can simply register and start using it. Initially, the action requires approval from the admin. By default, every patient needs to provide symptoms details. In addition, the customer can view their appointment and view hospital bills.

Roles and Responsibilities:

- Write reusable, testable, and efficient code.
- Developed the applications using DJANGO MVT framework which is based on model, view and template design pattern.
- Design and implement low-latency, high-availability, and performant applications.
- Integration of user-facing elements developed by front-end developers with server-side logic.
- Implementation of security and data protection; integration of data storage solutions.
- Performance tuning, improvement, balancing, usability, automation.

- Queried MYSQL database queries from Python using Python-MYSQL Connector and MYSQL DB package to retrieve information.
- Work collaboratively with the design team to understand end-user requirements to provide technical solutions and for the implementation of new software features.

Jr Python Developer

Vistan NextGen Pvt Ltd *Jan 2022 - Jul 2023*

Project : Flunkey Autonomous Web Application

Description:

Flunkey is a dynamic web application which is especially designed and developed for controlling food delivery robots in restaurants.

The main features are Bot selection, Table selection, Filters, Food item selection and Download data from database.

Roles and Responsibilities:

- Developed a client-facing web application using Django, resulting in a 25% increase in customer satisfaction through enhanced user experience.
- Integrated RESTful API services, enabling seamless third-party data integration and expanding the application's functionality for end-users.
- Participated in regular code reviews, ensuring high-quality standards were consistently met across all development efforts.
- Debugged complex software issues, leading to a more stable product release.
- Improved application performance by optimizing Python code and implementing best practices.
- Contributed to a positive work environment by mentoring junior developers on Python best practices and coding standards.

EDUCATION

Bachelor of Technology

JNTUA *Jul 2015 - Apr 2019*

Intermediate

Sri Satya Sai Jr College *2013 - 2015*

SSC

Z.P.H School *2011 - 2012*

LANGUAGES

English

Telugu
