CERTIFICATES

.NET (01/2020 - 02/2020)

ASP. NET programmers write, test, and debug programs to develop web-based applications, and dynamic websites using ASP. NET framework. They consult with clients as well as analyze technical specifications to design new features or enhancements in applications. These programming experts usually have a computer science degree along with the expertise in ASP. NET web programming.

IBM Python for Data Science Professional Certificate (12/2023 - 01/2024)

This certificate program provides comprehensive training in Python programming specifically tailored for data science applications. Participants will learn essential Python concepts and libraries commonly used in data analysis, manipulation, visualization, and machine learning. Through hands-on projects and real-world case studies, students will gain practical experience in leveraging Python for data-driven decision-making and predictive modeling.
