

SUMMARY

Results-driven software developer with expertise in Reactjs, Laravel, Vue.js, Node.js, MySQL, and PostgreSQL, specializing in HRMS, attendance tracking, payroll, and reporting systems. Passionate about building scalable and efficient solutions, integrating advanced APIs, and optimizing performance. Seeking a challenging role in a reputed organization where I can leverage my skills to drive innovation, contribute to business success, and grow as a dynamic professional.

EXPERIENCE

01/2024 - Present	OASYS TECH SOLUTIONS PHP Developer
05/2023 - 12/2023	WEBBRAINS TECHNOLOGIES Software Engineer
08/2021 - 05/2023	RIXOSYS PVT LTD Full Stack Developer

PROJECTS

People O (HRMS)	• This project is build up with Laravel and Vuejs . • Developed and optimized attendance management features. • Implemented payroll processing and salary calculations. • Built appraisal management modules for performance evaluations. • Designed and generated reports in PDF and Excel formats. • Enhanced system performance and efficiency through API and database optimizations. • Wrote Api's for mobile application as well .
Nowus and Futuhere	• Direct development while remaining focused on client needs. API designing. Wrote all of their Api's for Roku app development . • Wrote maintainable and extensible code by myself there are no helping hand . • Fix the frontend issue with React.js as per client said and some new features as well .

Urja Jan Shakti

- This is an attendance tracking application for Purvanchal Electric Department (Govt.).
- Integrated Google Maps to enable real-time employee location tracking and historical movement visualization.
- Built role-based access, allowing admins and nodal officers to monitor employee locations via a roadmap view.

Representing ME

- Work from scratch there are no helping hand . Wrote all of their Api's using Laravel.
- Work on the FrontEnd as well using Vue.js .
- The cool part is creator can go live through the panel and live videos goes download automatically after creator live end and store in AWS Bucket .

EvalzNow

- This is a SaaS based project .
- Working with client side by side on a zoom call meeting which is more difficult part i am facing in this project so far on the because on the mean time i am changing the requirement or functionality as per client needs .
- Work from scratch . Deal with MySQL database .
- Wrote all Api's using Nodejs.
- Work on the FrontEnd using React.js. Work with 3rd party library like plotly.js ,Recharts , Express.js ,SendGrid ,Axios etc.

ELabels

- Work with a team consists of 4 members.
- Integrating 3rd party libraries like BigCommerce , Shopfront Work with webhooks for data sync .
- Basically this is an application where 3 apps are connected with each other Zkong , Shopfront , Bigcommerce .

Milk Procurement

- Developed RESTful APIs using Node.js and MySQL for managing milk distribution and records.
- Implemented authentication using OTP based and secured user access for farmers and societies.
- Integrated Redux for state management and utilized Redux-Saga for handling API side effects.
- Established the connection between React, Redux, and Redux-Saga to manage data flow efficiently.
- Worked on a government project with 4 members team to enhance transparency in milk distribution and record-keeping.

SKILLS

- HTML
- CSS
- JAVASCRIPT
- NODEJS
- REACTJS
- PHP (Laravel)
- ANGULAR
- MYSQL
- GIT

EDUCATION

2016 – 2020	KRUPAJAL ENGINEERING COLLEGE B.Tech	64%
2014 – 2016	GOPABANDHU SC COLLEGE Science	47%
2005 – 2014	GUIDANCE ENG MEDIUM SCHOOL 10th	74%

LANGUAGE

- ENGLISH
- HINDI
- ODIA
