Project Management : Jira, Confluence, Gitlab

Tools : Visual Studio Code, Notepad++, XAMPP, Docker

WORK EXPERIENCE

Associate Software Engineer | TA Digital (Omnicom)

(Aug 2022 - Present)

- Coordinated with UX designer and BA to identify and develop reusable and responsive components by following atomic design model in **Timesheets Revamp** to develop browser compatible layouts
- Developed an interactive user interface and managed the backend tasks for creating templates using SCSS, ReactJS, and Drupal9 for the **Mercedes-Benz NFT** client.
- Took on the task of identifying issues in the user interface like visual glitches, layout problems in **TA Intranet** and employed problem-solving approach where I analyzed the bugs, diagnosed the root causes, and implemented effective solutions
- Created high-fidelity prototypes in Webflow in collaboration with **Organic** for different clients like Bodwe, 7gen, Bluestar, MNO in which we incorporated elaborate style guides as well for future implementations.
- I served as a content author for **Novartis-Credera** client in the capacity of contributing to a Drupal Migration project.

PERSONAL PROJECTS

- **KRAYA | React, Hooks, Redux, React Router**

An e-commerce website with state management and different functionalities - add to cart, buy, like, sort and utility shopping cart

- **Build your own car | Html, CSS, JS, Bootstrap**

A product website providing a unique user experience of being able to customize internal and external features and visualize the final product

- **WEATHER APP | Html, CSS, JS, API**

A weather condition tracker that uses the Open Weather API to fetch current weather data for given locations, includes swipe functionality and the theme of background and icons change as per the conditions

CERTIFICATES

- **HTML, CSS , JAVASCRIPT** - Udemy Certification Course
- **The Complete Agile Scrum Fundamentals** Course + Certification
- **React Complete guide with React Hooks and Redux**
