

SARAN M

JUNIOR PYTHON DEVELOPER

PROFILE

With 2 years of experience as a Junior Python Developer, I bring proficiency in Django, Flask, and SQL to drive innovative solutions. Ready to excel in a dynamic role, I am poised to meet project goals with efficiency and contribute to impactful development.

WORK EXPERIENCE

Learningbrite Technologies Private Limited

Mar 2022 - Till Date

Junior Python Developer

TECHNICAL SKILLS

Programming Languages : Python

Web Development : HTML, CSS, Django, Flask

Databases : MySQL, PostgreSQL, SQL

Cloud Computing : Amazon Web Services (AWS)

Version Control : Git

Web Services : RESTful APIs

Project Management: Agile/Scrum methodologies

Frameworks/Libraries : React.js

EDUCATION

BCA (Bachelor of Computer Applications)
2017 - 2020

Kamaraj College

LANGUAGE

- English
- Tamil

SUMMARY

- As a Python developer with 2 years of experience, I have a proven track record in developing robust and efficient Python applications, emphasizing the delivery of high-quality, scalable code solutions.
- My experience includes collaborating with cross-functional teams to design and implement innovative software solutions in Python, contributing to the success of multiple projects.
- I am proficient in utilizing Python libraries and frameworks, such as Django and Flask, to create dynamic and interactive web applications tailored to specific client requirements.
- I possess skills in optimizing code performance and improving application efficiency through effective debugging and troubleshooting, ensuring smooth and seamless user experiences.
- With familiarity in database management systems like MySQL and MongoDB, I enable efficient data handling and integration within Python-based applications.
- Demonstrating the ability to write clear and concise technical documentation, I facilitate seamless knowledge transfer and ensure effective communication within the development team.
- I am well-versed in version control systems like Git, ensuring efficient collaboration, code management, and versioning across different development stages.
- Proficiency in implementing RESTful APIs enables seamless communication between various components and smooth integration with third-party services.
- My knowledge of software development best practices, including Agile methodologies, enables the delivery of high-quality software products within stipulated timelines.

Project Worked

Learningbrite Technologies Private Limited
E-Commerce / Ringier

Mar 2022 - Till Date

- Ringier is a Swiss media company that operates in over 18 countries worldwide. The company was founded in 1833 and has since expanded into various industries, including publishing, digital media, ecommerce, and classifieds.
- Ringier's publishing division publishes several well-known magazines and newspapers in Switzerland, including the Blick newspaper, Schweizer Illustrierte magazine, and Bilanz business magazine. It also operates several online platforms, including job portals, real estate classifieds, and automotive marketplaces.

Responsibility

- Developing and maintaining Python-based applications using Django to ensure seamless functionality and optimal performance, such as an e-commerce platform for a retail client.
- Designing, implementing, and maintaining scalable and secure RESTful APIs to facilitate smooth communication between different components of a healthcare management system.
- Managing and optimizing MySQL databases to ensure efficient data storage, retrieval, and manipulation within a financial analytics platform for an investment firm.
- Utilizing AWS services like EC2, S3, and RDS to deploy, manage, and scale web applications, ensuring high availability and reliability for a cloud-based document management solution.
- Collaborating with cross-functional teams to gather and analyze requirements, translating them into technical solutions using Python, Django, and MySQL for a collaborative project management tool used by remote teams.
- Implementing security best practices in Django applications and MySQL databases to safeguard sensitive data and prevent potential vulnerabilities in a government portal handling citizen information.
- Integrating third-party APIs into Django applications to extend functionality and provide additional features, such as integrating payment gateways into an e-commerce application for seamless transactions.
- Designing and implementing data models and schemas in MySQL, ensuring the integrity and consistency of data across the application, such as developing a real-time messaging platform for a social networking startup.
- Setting up and configuring AWS services, including managing access control, monitoring resources, and optimizing costs for a cloud-based educational platform catering to students and educators.
- Ensuring the responsiveness of applications and maintaining seamless communication with front-end developers to integrate user-facing elements with server-side logic, as seen in a customer relationship management (CRM) system for a sales team.
- Troubleshooting and debugging issues within the Python, Django, MySQL, and AWS environments to ensure the smooth functioning of applications, such as a travel booking platform handling high traffic volumes.
- Documenting the development process, including code comments, technical specifications, and user guides, to facilitate seamless knowledge transfer and team collaboration in a project management tool used by software development teams.

Declaration

I am Saran, hereby declare that all the information provided in this resume is true and accurate to the best of my knowledge. I understand that any misrepresentation or falsification of information may result in disqualification from the hiring process or termination if already employed.
