Education

Indian Institute of Technology Roorkee (IIT Roorkee)

CGPA: 7.02

B.Tech in Civil Engineering

K.V.N. Public School, Rajatalab, Varanasi

Percentage: 80.2

12th

Technical Skills

Languages: C++, HTML/CSS, JavaScript, Typescript, Python, SQL

Frameworks/Libraries: NextJs, ReactJs, Tailwind, ExpressJs, NodeJs, MongoDB, Socket.io, Redux, NestJS, RabbitMQ

Experience

Code Clause - Frontend Developer (Remote)

May 2022 – October 2022

- Developed an e-commerce platform using React for the front end and login page using Firebase for user authentication.
- Implemented Redux Toolkit for efficient state management and implemented "Add to Basket" functionality using it.
- Tech Stack: **ReactJs, Redux.js, Firebase**

Yolda - Fullstack Developer (Remote)

Oct 2023 – Nov 2024

- Created a calendar from scratch using date-fns and react-swiper for a schedule management app where managers can track upcoming reservations matching with customer schedules and perform CRUD operations.
- Implemented Zustand for efficient state management & synchronizing data across components.
- Tech Stack: **Next.js, Zustand, Supabase, Date-fns, React-Swiper, TypeScript**

HOI - Your Travel Companion - Fullstack Developer (On-site)

Nov 2024 – Oct 2025

- Implemented the "Track Flight" feature by developing APIs for list of Flight schedules, add, list and update in real-time. User tracked flights.
- Designed and built the full eSIM purchase flow: from country-wise package listing to cart management, checkout, applying/removing offers, and viewing purchase history.
- Quickly adapted to a complex backend ecosystem and contributed high-quality codes.
- Tech Stack: **NestJS, TypeORM, Docker, RabbitMQ**

Personal Projects

🔗 **Tic-Tac-Toe Game** | 🌐 | *Fullstack*

- Built a real-time Tic-Tac-Toe game using Nakama server for matchmaking, multiplayer rooms, RPC calls, and authoritative game logic.
- Includes Bot and Multiplayer modes with Nakama matchmaking, plus a global leaderboard for player rankings.
- Added features like turn timers, reconnection support, player presence, and win/draw detection.
- Tech Stack: **React Native (Expo), Nakama Server (Golang), WebSockets**

🔗 **AI Chat App** | 🌐 | *Fullstack*

- Developed a realtime chat application using Nextjs and Shadcn, featuring instant message updates and dark/light theme.
- Integrated Supabase for secure user authentication, supporting email and Google sign-ups with session management.
- Enabled users to access chat history with an AI bot.
- Tech Stack: **Nextjs, Supabase, Shadcn, Clerk**

🔗 **XChord** | 🌐 | *Fullstack*

- XChord has features like servers and channels. Developed features like Text, Audio, and Video call Channels and also implemented Socket.io for real-time messaging, enabling instant text and attachment sharing among users.
- Designed and integrated member management features including Kick, Role change, and unique invite link generation, ensuring secure and controlled interactions.
- Created a visually appealing UI with TailwindCSS and ShadcnUI, supporting Light/Dark mode, including features like pagination and infinite loading for older messages to improve the performance of the app.
- Tech Stack: **NextJs, Typescript, Socket.io, Prisma, Tailwind, React-Query**
