## Objective

---

Software Engineer with 1.8+ years of experience specializing in backend development using Python and Django. Skilled in deploying web applications using tools like cPanel and WHM, integrating APIs, and delivering scalable solutions. Currently seeking to leverage my technical skills and industry knowledge to contribute to impactful projects in a dynamic organization.

## Experience

---

- **Crushaders Tech Solution, Bhubaneswar** 08-May-2023 - Present  
Software Engineer
  - Developed and maintained web applications using Python and Django framework.
  - Utilized Django ORM for efficient database management and query optimization.
  - Deployed applications using WHM and cPanel.
  - Collaborated with cross-functional teams for timely project delivery.
  - Optimized application performance and scalability.
  - Resolved technical issues promptly to ensure smooth operation.
  - Contributed to code reviews and continuous improvement efforts.

## Projects

---

- **MCQ Exam System for Vidya Bhaban (IIT Bhubaneswar Incubated project)**
  - Developed an MCQ system with admin, teacher and student panels.
  - Admin can set questions, options, answers and time limits, and manage teachers.
  - Students signup, take exams within the time limit, and receive results via email.
  - Teacher can log in after admin approval to set questions and view student marks.
  - Technologies used: Python, Django, HTML, CSS, JavaScript, MySQL.
- **Monthly Fee Collection System for Vidya Bhaban (IIT Bhubaneswar Incubated Project)**
  - Implemented a fee collection system with four panels: Admin, Teacher, Institute, and CCO/VPO/CP.
  - Admin manages all user accounts, including creating login credentials for each panel, with automated emails sent to institutes upon creation.
  - Institutes manage student fee collection via Razorpay, and fees are split between Admin (50%) and Institute (50%).
  - Teacher panel includes Zoom API integration for online classes.
  - Technologies used: Python, Django, HTML, CSS, JavaScript, MySQL, Razorpay API, Zoom API.
- **HRMS Project**
  - Developed the admin panel of a Human Resource Management System (HRMS) for efficient employee management, salary processing, and attendance tracking.
  - Key features worked on include employee creation, managing employee lists, and processing employee salaries.
  - Implemented timesheet management with functionalities such as attendance viewing, processing, and approval.
  - Technologies used: Python, Django, HTML, CSS, JavaScript, MySQL.
- **CMS - College Management System**
  - Developed a comprehensive system with three panels: Admin, Student, and Teacher.
  - The Admin panel manages users, departments, classes, student and employee data, documents, salaries, schedules, leave requests, fundraising, finances, and communication.
  - The Student panel allows students to view fees, schedules, exam results, submit documents, and request leave.
  - The Teacher panel enables attendance tracking, class schedules, syllabus management, leave requests, and result management.
  - Technologies used: Python, Django, HTML, CSS, JavaScript, SQLite.

## Technical Skills

---

- Programming Languages: Python
- Web Development: Django, HTML, CSS, JavaScript, Bootstrap
- Database Management: SQL, SQLite, MySQL
- API Skills: RESTful APIs, Razorpay API, Zoom API, WhatsApp API
- Automation: Selenium for browser automation
- Deployment Skills: WHM, cPanel, and hosting
- Version Control: Git, GitHub
- Development Tools: Visual Studio Code

## Softs Skills

---

- Strong problem-solving skills and adaptability
- Excellent communication and teamwork abilities
- Ability to quickly learn and adapt to new technologies
- Time management and multitasking

## Education
