Projects

- Weather Dashboard Application**
(**React.js, REST API, useEffect, JavaScript, CSS**)
Built a React application that integrates real-time weather data using REST APIs and manages side effects with useEffect. Implemented loading and error states to handle asynchronous data fetching smoothly.
- Task Management App**
(**React.js, Props & State, JavaScript, HTML, CSS**)
Developed a component-based task management app using React, handling data flow through props and managing dynamic UI updates with state. Enabled task creation, completion, and deletion with real-time rendering.
- UI Component Management System**
(**React.js, State Management, Conditional Rendering, CSS**)
Created reusable UI components such as modals, tabs, and accordions using React state for UI control. Focused on clean component architecture, responsive design, and consistent user experience.
