Kakinada, Andhra Pradesh,

India

Technical Skills

- **Programming:** Java, Python, Typescript, Javascript
- **Front End:** React JS
- **Backend:** Spring Boot
- **Database:** PostgreSQL, Snowflake
- **Cloud:** AWS - Lambda, SQS, S3, Elastic Cache, CodeCommit, CodePipeline, Codebuild
- **Version Control:** GIT

Experience

Backflit | Java, Reactive Spring, React JS, AWS, Typescript, Postgresql, Snowflake, Redis

Associate Software Engineer | 09/2021 – Present

Company Lens - IDC's Company Lens delivers a holistic view of market vendors, growth rates, spending trends, partner networks, and IT buyer behavior to drive informed strategic decisions in different sectors.

Responsibilities

- Developed export feature for Company Lens data, **handling over 1 million rows**, by leveraging an existing export framework based on an **event-driven microservices** pattern.
- Collaborated on the design of a **credits management service** which allows multiple users to utilize credits linked to an account, ensuring system accuracy through the incorporation of **locking mechanisms** and rollback procedures.
- Contributed to the design of a **scalable architecture** using **bitmaps** to store unlocked companies information for users, enabling efficient management of millions of companies per country.
- Led full-stack development of the Search Page, incorporating various search filters and infinite scrolling, and **enhanced system performance** by **optimizing database queries**.
- Engineered and implemented a Redux data structure for filters management, and added skeleton code for filter manipulation logic, **streamlining development efforts for other team members**.

Channel Partner Ecosystem - IDC's Worldwide Channel Partner Ecosystem offers a comprehensive analysis of IT vendor channels, detailing partners' technological, industry, and geographic coverage.

Responsibilities

- Analyzed and **optimized SQL queries** through **profiling** in Snowflake, employing **clustering** and **search optimization** strategies to **reduce run times by 95%** and decrease costs by 75%.
- **Enhanced** UI responsiveness by **implementing** strategic rendering checks and **optimizing** state management for React components.
- **Refactored** existing huge backend **monolith into separate microservices** for each sub product and refactored code to different reusable artifacts.
- Revamped extensive frontend code by **creating separate libraries** for **enhanced modularity** and designed reusable components, significantly **boosting development efficiency** and saving substantial time.

Education

B.Tech 07/2021

Bachelors in CSE, Jawaharlal Nehru Technological University | Kakinada

CGPA: 8

Intermediate 04/2017

MPC, Aditya Junior College | Kakinada

Marks: 984/1000

Languages

Telugu - Native or Bilingual Proficiency

Hindi - Full Professional Proficiency

English - Full Professional Proficiency

Achievements

- Received **Pratibha Award 2015** for high academic record by Govt. of AP.
- Winner of **Bhagavad-Gita competition 2021** by Iskcon Hari Krishna Folk Nivas
- Secured 5000 rank in AP EAMCET
