Key Projects

(Learn Amigos) Worked in a college project

Language used: HTML, CSS, MongoDB, JavaScript, Python

Abstract: Learn Amigos offers an integrated platform that seamlessly blends traditional educational practices with modern digital tools, enabling students to connect in real time within their educational institution. It allows students to engage in video calls, share notes, send messages, and create study schedules, thereby encouraging collaborative learning and improving academic productivity.

Description: A significant advancement in educational technology, bridging the gap between conventional educational practices and the growing digital learning needs. The platform encourages an interactive and comprehensive learning experience, promoting academic productivity and transforming the learning process within the educational institution. **Database:** MongoDB

Worked in a Live Project

Language used: HTML, CSS, MongoDB, JavaScript, Bootstrap

Build a Website for a Charity

Website: <https://www.ailsmt.com/>
