INTRODUCTION

I am a dedicated Software Engineer with 2 years of overall experience in web development , including approximately 1.5 years of industrial experience. I specialize in building responsive , high performance web and mobile applications and am skilled at optimizing code for both efficiency and maintainability.

EXPERIENCE

Live Digital Technologies Pvt. Limited (LD TECH), Bhubaneswar

July 2023 - PRESENT

Associate Software Engineer

- Enhanced the user interface, resulting in a **25% improvement in user experience** for Operator and Manager modules in weighbridge application
- Utilized on **HTML, CSS, React JS, Bootstrap** to create seamless user experience, responsive design and increase **efficiency of the websites by 50%**
- Developed a cross-platform mobile feature using **React Native**, allowing users to track real-time weighbridge data on both Android and iOS, improving accessibility and user engagement.

EDUCATION

SILICON INSTITUTE OF TECHNOLOGY

CGPA: 8.7

Bachelor of Technology – Computer Science And Engineering

Aug 2019 – May 2023

TECHNICAL SKILLS

Web Technology: HTML5, CSS3, JavaScript, ES6

Frontend Technology: React JS , React Native

Backend Technology: NodeJS

CSS Frameworks: Bootstrap, Material UI

Tools/Platforms: VS Code, IntelliJ

Databases: MySQL, MongoDB

Version Control: GIT/GITHUB

PROJECTS

WEIGHBRIDGE APPLICATION *React JS, SQL, Bootstrap, Java, Spring Boot*

Nov 2023 - Present

- Role (Frontend Developer)
- Optimized codebase by removing redundancies, improving maintainability with React JS
- Reduced page load time by **40%** through code optimization and lazy loading techniques.
- Followed coding standards and best practices , including version control and code reviews.
- Worked in Agile Development Environment with frequently changing requirements and features.
- Description :** Weighbridge Management System is a software application designed to automate and streamline the vehicle weighing process, ensuring accuracy, efficiency and security . This system is essential for industries such as logistics , manufacturing , mining , and agriculture , where accurate weight measurements are crucial for inventory management , billing and compliance with regulations.

ASSET MANAGEMENT SYSTEM *React JS, Bootstrap, SQL, JAVA SPRINGBOOT*

July 2024 - Present

- Role (Frontend Developer)
- Description :** The Asset Management System facilitates the process of managing and allocating company assets. It includes features like request submission by users, administrator reviews, and asset assignment tracking. The system enhances efficiency by automating asset requests, ensuring availability, and maintaining detailed logs of asset usage and status.

CERTIFICATION

Completed **MERN Stack Development Course** on Udemy | **August 2023**
