Professional Summary

Dynamic Developer with expertise in Python, Flask, FAST API, and Django, skilled in programming languages and software development. Proficient in data science, data engineering, semantics, knowledge graphs, and ontologies, with a strong focus on research and development in distributed environments. Experienced in Agile methodologies like Scrum and capable of effective data processing, unit testing, and query optimization. Committed to delivering high-quality software solutions that meet architectural requirements and enhance user experience in healthcare and natural resources with a strong emphasis on collaboration and communication.

Education

Bachelor of Technology in Computer Science and Engineering

Silicon Institute of Technology, Sambalpur

2020 – 2024

CGPA: 8.04/10

Technical Skills

- **Languages:** Python, Java
- **Web Frameworks:** Flask, FAST API, Django
- **Web Technologies:** HTML, CSS, Javascript
- **APIs:** RESTful APIs,
- **Databases:** MySQL, SQL
- **UI/UX Designing:** Figma , Adobe Xd

Internship

UI/UX Designer & Full Stack Developer

Plade

- Improved backend responsiveness by 30% by integrating load balancer and CRM software, ensuring high-performance infrastructure.
- Enhanced UI performance by 80% through usability testing and compliance with business needs in a global project setting.

Frontend Developer

CARIKTURE

- Increased user engagement by 50% by developing responsive interfaces with a customer-focused design.
- Conducted A/B testing to improve user satisfaction by 30%, employing unit testing strategies for robust software delivery.

Projects

Real-Time E-Commerce Order Tracking System

C#, SQL, .NET, ReactJS

- Improved customer satisfaction by 45% through database optimizations and effective data modeling using SPARQL and graph databases.

IoT Data Analytics Dashboard

Python, Google Cloud IoT Core, BigQuery

- Developed a data pipeline for processing IoT sensor data, enhancing decision-making and ensuring data security.

Machine Learning Model Deployment

Python, TensorFlow, Google Cloud

- Reduced model inference time by 30% through optimized resource allocation and semantic analysis.

Automated Customer Support Chatbot

Python, Flask, NLP

- Developed a customer support chatbot using NLP, reducing support wait time by 40%.

Sentiment Analysis Tool

Python, NLTK, Flask

- Created a sentiment analysis tool that classifies customer feedback as positive, negative, or neutral, enhancing user satisfaction assessment.

Certifications

- **Software Testing Certification** — NIIT Foundation by Microsoft

Achievements

- **Smart India Hackathon Finalist** — 2022
- **Hardware 2.0 Finalist** — 2023
