PROFESSIONAL SUMMARY

UI/UX developer with hands-on experience designing and implementing responsive, accessible web interfaces. Worked on multiple government and private sector projects, focusing on clean UI, smooth navigation, and consistent design. Involved in understanding requirements, implementing front-end features, and improving overall user experience. Also experienced in preparing technical documentation to support clear communication and smooth project delivery. Currently working at Parameter Software, contributing to ongoing development and usability improvements.

PROFESSIONAL EXPERIENCE

Parameter Software Pvt. Ltd.

April 2025 - Present

Full-Time | Web Developer

- Worked on UI/UX design for web applications, ensuring a smooth and user-friendly experience.
- Created AI-generated videos using advanced generative tools; developed storyboards, scripted scenes, and produced visually compelling content for digital platforms.
- Designed graphics, UI mockups, and social media creatives using Figma and Canva.
- Contributed to the VSSUT & Autonomous Colleges Academic Document Management Portal by working on front-end features of landing page
- Developed the homepage and inner pages of the Land Asset Management System (LAMS) for Falcon Group, focusing on UI development and smooth functionality.
- Worked on developing the homepage and inner (static) pages for the RIPAE&S website (Training, Hostel & Library Management System), focusing on clean layout and user-friendly design.
- Prepared and maintained UAT (User Acceptance Testing) documents by defining test scenarios, test cases, and expected outcomes.
- Handled documentation work like User Manuals, DPR, and SRS to ensure clear requirements, proper testing, and smooth project handover.
