Profile Summary

Highly motivated and dedicated Java Full Stack Developer with 8 months of intensive training in full stack development and I have completed 3 months internship in java developer position. Experienced in completing real-time projects that have honed my skills in Java programming, web development, and database management. Demonstrated ability to deliver high-quality solutions that align with business requirements. Eager to embark on a developer career and contribute to an organization's success by driving impactful solutions and staying up-to-date with emerging trends and technologies. Ready to contribute to your organization's success and drive impactful solutions.

Education

Blood Bank Management System

- Technologies Used:--servlet,jsp, html, css, javascript, mysql, tomcat server
- Tools/IDE:Eclipse, SQL-Yog, ApacheTomcat 9.0
- Description:-- Developed a Blood Management System, a user-friendly website aimed at facilitating the collection and donation of blood. Designed to cater to individuals with active internet connections, the website allows users to easily search for blood donors. The primary objective of the project is to provide assistance to people residing in rural areas. Implemented intuitive features and functionalities to

Technical Skills

Programming Languages: Java
|Servlet| Jsp| Jstl

Web Technologies: HTML| CSS|
Java Script| React Js| REST API|
JSON

Frameworks: Spring| Spring
Boot| Hibernate| JPA

Cloud: Amazon Web Services
(AWS)

Build Tools: Maven Gradle

Databases: MySQL| JDBC| Oracle
10g

IDEs: Eclipse| SQLyog| Visual
Studio| MySQL Workbench|
Apache NetBeans

Operating System: Windows

Problem Solving

Communication

**Utilized Spring and Spring Boot
frameworks to create scalable
and efficient web applications
enhancing productivity and
reducing development time.**

**Designed and developed RESTful
APIs enabling seamless
integration with external
systems and facilitating data
exchange.**

**Implemented JPA and Hibernate
for object-relational mapping
ensuring efficient database
persistence and management.**

**Successfully utilized Maven and
Gradle build tools for project
management dependency
management and automated
builds.**

1 Months

streamline the process of finding suitable donors. Contributed to enhancing access to life-saving blood transfusions in underserved communities.

Enotes

- **Technologies Used:-** servlet, jsp, jdbc, html, css, bootstrap4.0
- **Tools/IDE:** Eclipse, SQL-Yog, Apache Tomcat 9.0
- **Description:-** Implemented an eNotes project using Java, featuring user registration, login functionality, and a user-friendly interface. Developed a website that allows users to create and store personal notes securely. Upon successful registration and login, users are directed to the home page. Implemented a navigation bar with options to add a new note. Users can input their note content and save it to the database. Implemented a feature to display the saved notes upon clicking the "Show Note" button. Ensured efficient data storage and retrieval by utilizing a database management system.

Employee Management System

- **Technologies Used:-** servlet, jsp, jdbc, html, css, bootstrap4.0
- **Tools/IDE:** Eclipse, SQL-Yog, Apache Tomcat 9.0
- **Description:-** Implemented an Employee Management System project using Java, SQL-Yog, JPA, Spring, Spring Boot, Servlet, JSP, HTML, CSS, and Bootstrap. Developed a user-friendly website with features including user registration and login functionalities. Upon successful login, users are directed to the home page. Implemented functionality for employees to input the number of days they have worked, their salary information, and important notes. Ensured data persistence and retrieval using JPA and the SQL-Yog database. Designed and implemented the frontend using HTML, CSS, and Bootstrap for an enhanced user experience. Contributed to streamlining employee management processes and facilitating accurate salary calculations.

Created visually appealing and responsive user interfaces using HTML CSS JavaScript and React.js resulting in enhanced user engagement and satisfaction.

Effectively collaborated with cross-functional teams to analyze requirements design solutions and deliver high-quality software products.

Personal Information

Date of Birth 28-November-2000

Address JPNagar, Bangalore

City Bangalore

Country India

Marital Status Single/Unmarried

Other Interests

- Photography
- Learning New Programming Languages
- Hackathons and Coding Challenges

1 Weeks

Crud Operation

- Technologies Used-- html, css, java script, react js, mysql
- Tools/IDE: VS Code
- Developed a project using React.js, HTML, CSS, JavaScript, and Bootstrap, focusing on CRUD (Create, Read, Update, Delete) operations. Implemented a user-friendly interface that allows users to perform various data manipulation tasks efficiently. Through this project, gained hands-on experience in front-end development, including React.js, JavaScript, and responsive design principles. Developed a solid understanding of the CRUD operations, data management, and user interface implementation. Demonstrated proficiency in utilizing modern web development technologies to deliver a fully functional project, showcasing effective data manipulation capabilities.

Courses & Certifications

- Achieved a commendable score of 71% in the TCS NQT exam. (Valid upto August 2024)
- Participated in an AWS webinar organized by Amazon.
- Completed (JAVA,J2EE,FRAMEWORK,MYSQL & Web Technologies) Training from Jspiders BTM Bangalore. (Valid upto 2023)
