SOFTWARE DEVELOPER

As a recent postgraduate with expertise in SQL, Python, JavaScript, and Machine Learning, I bring a solid foundation in problem-solving, statistical analysis, and programming. My academic background has equipped me to tackle real-world challenges, and I am eager to contribute to the development of innovative software solutions. Passionate about continuous learning, I am excited to collaborate with industry experts to enhance my skills and deliver impactful results.

SKILLS AND EXPERTISE

C++	HTML	Docker
Python	CSS	Git & GitHub
JavaScript	React	Machine Learning
SQL	Node.js	Artificial Intelligence
MongoDB	Expressjs	Data Analytics

PROJECTS & EXPERIENCE

RESUME SCREENING APP DEVELOPER

SEPTEMBER 2024 - October 2024

This project is solely intended to increase knowledge about Python libraries, natural language processing, and machine learning. Project examines a person's résumé to determine what position they are applying for in the IT sector. This project made use of the following technologies VS Code for app development, Jupyter Notebook to create ML models, Scikit-learn package facilitates machine learning and data analysis. KNeighbour Classification for testing and training data. Streamlit library for creating web applications. Pandas and NumPy to manipulate the dataset. Seaborn and Matplotlib are tools for data visualization. Regular Expression for Cleaning Data.

Important: Although the software currently predicts some resumes erroneously, it always offers accurate predictions when uploaded straight into the Jupyter Notebook.

CREDIT CARD FRAUD DETECTION USING MACHINE LEARNING DEVELOPER

MARCH 2024 - MAY 2024

This project's objective was to evaluate three well-known machine learning models—Random Forest, Decision Tree, and Logical Regression—on a collection of data. comprising credit card transaction data and determine which one has the best accuracy rating for identifying fraudulent transactions. This project made use of technologies like scikit-learn for model development, NumPy and Pandas for data manipulation. Seaborn and matplotlib for data visualization.

EDUCATION

UTKAL UNIVERSITY

M.Sc. in Computer Science

September 2022 - Present

SAMBALPUR UNIVERSITY

B.Sc. in Computer Science

August 2018 - September 2021
