

TOPHAN GIRI

Jr. Software Engineer

+91 8480675713 | Jagatsinghpur, Odisha | tophangiri036@gmail.com

SUMMARY

Enthusiastic Junior Software Engineer with 9 months of hands-on experience in software development. Skilled in designing, developing, and maintaining web applications using modern technologies. Passionate about learning new tools, writing clean code, and contributing to team success.

TECHNICAL SKILLS

Java	Data JPA	HTML
JDBC	Spring	CSS
Hibernate	Spring Boot	JavaScript
GitHub	MySQL	React JS
Postman		

Experience

- **At:** Appticode Pvt Ltd
- **Duration:** Apr 2025 – Present
- **Location:** Bhubaneswar

Project

HRMS (Human Resource Management System)

- Roles & Responsibilities:**
- I worked on an HRMS (Human Resource Management System) project with a team of four members.
 - The project aimed to automate HR operations and reduce manual work, errors, and time delays.
 - Focused on developing and improving key modules like Authentication, Employee Management, Payroll Management, Leave Management, and Attendance Management.
 - Authentication Module: Solved the problem of unauthorized access by implementing secure login and role-based access control.
 - Employee Management Module: Solved the problem of manual employee record handling by providing digital employee data storage and management.
 - Payroll Management Module: Solved the problem of salary calculation mistakes by introducing automated payroll processing and payslip generation.
 - Leave Management Module: Solved the problem of unorganized and delayed leave approvals through online leave request and approval workflow.
 - Attendance Management Module: Solved the problem of inaccurate attendance tracking by automating attendance and working hour monitoring.

Project

Task Management Project

Roles & Responsibilities:

- Developed a Task Management System using React.js for managing daily tasks and team activities.
- Designed an interactive user interface with components for adding, editing, updating, and deleting tasks.
- Implemented task categorization (e.g., pending, in-progress, completed) for better task tracking.
- Used React Hooks (useState, useEffect) to manage state and improve component reusability.
- Integrated form validation and responsive design to enhance user experience on all devices.
- Added search and filter functionality to quickly locate tasks based on keywords or status.
- Focused on clean UI/UX design for easy navigation and improved productivity.
- Helped users organize work efficiently, increase productivity, and reduce missed deadlines.

Hospital Management App

Roles & Responsibilities:

- Developed a Hospital Management Application using Java Spring Boot and REST APIs for a B2B (Business-to-Business) model.
- Designed backend APIs to manage hospitals, branches, doctors, patients, and appointments efficiently.
- Implemented Appointment Scheduling Module to handle doctor availability, time slots, and booking management.
- Built Authentication and Role-Based Access for secure access by admins, hospital staff, and patients.
- Integrated Branch and Department Management to streamline multi-location hospital operations.
- Developed Patient Record and Medical History Management to reduce data redundancy and improve accessibility.
- Ensured data validation, exception handling, and JWT-based security for safe and reliable API interactions.
- Helped hospitals automate operations, improve patient service, and enhance coordination between multiple branches.

EDUCATION

Master of Computer Application (MCA)

2021 - 2023

Krupajal Engineering College (KEC), Bhubaneswer

Bachelor Of Computer Application (BCA)

2018 - 2021

Swami Vivekananda Memorial Autonomous College (SVM), Jagatsinghpur

12th Science

2016 - 2018

Baisi Mouza JR College, Puran, CHSE Odisha

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Odia
- **Native Place:** Odisha
- **Nationality:** Indian
- **DOB:** 17/02/2000
