WORK EXPERIENCE

FICUSTEXAS TECHNOLOGIES PVT LTD (Presently working) Associate Software Engineer | Apr 2022 – Till Date

Project: Exchange Micro Agent Recovery | Sep 2022- Sep 2023

Exchange micro recovery agent is a wizard based application which allows administrator to recovery/retrieve the user mailbox from the backed up exchange database at granular/item/folder level or by using the search filter options. This works seamlessly without the help of exchange administrators.

Roles and Responsibilities:

- Understand/Develop the features laid out in the Sprint.
- Involved in Design, code development, peer reviews, development testing.
- Update the status of the software project to the Project Manager or Tech Lead.

INTERNSHIP

Project: Employee Attendance Tracker | Jul 2022 - Aug 2022

An Employee Attendance Tracker is a digital tool that records and monitors the attendance and working hours of employees, helping employers manage and analyze their workforce's presence and punctuality

Project: A Database Administrator's. | Jun 2022 - Jul 2022

MongoDB Database Administrator with expertise in creating and managing collections, optimizing query performance through indexing and aggregation, and utilizing the find command for efficient data retrieval.

Roles and Responsibilities:

- Collaborated in the development of an Employee Attendance Tracker using J2EE technologies.
- Implemented features for HR to query attendance data for specific employees.
- Create three collections: Orders, Categories, and Customers.
- Insert and query documents using MongoDB's find command.
- Optimize query performance through indexing and aggregation.
