CERTIFICATION

Introduction to Industrial Internet of Things 4.0 — NPTEL, IIT Kharagpur

INTERNSHIP

MERN Stack Developer Intern <i>Seeree</i>	Aug 2024 – Feb 2025
Web Developer Associate (Full-time) <i>Trackepay</i>	June 2025 – Present

PROJECTS

- Bookstore Management System (MERN Stack)**
- Developed a CRUD-enabled bookstore management application using React, Node.js, Express.js, and MongoDB.
 - Implemented secure authentication and role-based access.
 - Designed optimized APIs for inventory operations.
- Quotation SaaS Platform** — qt.trackepay.in
- Built a full-stack SaaS platform for generating quotations and invoices with automated delivery.
 - Integrated email and WhatsApp APIs for seamless document sharing.
 - Developed scalable UI components using React and Tailwind CSS.
 - Implemented backend services with Node.js, Express.js, and JWT authentication.
 - Added PDF generation and secure file delivery workflows.
- Walytic** — walytic.com
- Built backend chat automation using Baileys API for real-time WhatsApp messaging.
 - Integrated Stripe for secure payments, subscriptions, and billing workflows.
 - Implemented webhook processing with automated Excel ingestion and task execution.
 - Added an auto-setup system allowing users to configure auto-scheduled WhatsApp messages without manual intervention.

- Designed and implemented a Kanban-style WhatsApp CRM for lead tracking, drag-and-drop workflow management, and real-time status updates.
- Utilized Redis caching to improve performance and handle high-throughput message queues.

WhatsApp Automation SaaS (Baileys + Node.js)

- Designed automation workflows for WhatsApp using Baileys API.
- Added session handling, QR login, and rich media messaging.
- Implemented admin dashboards and audit logging using MongoDB.
