Nilesh Dash
Full Stack Web Developer

About Profile

Logical and organised individual with a strong foundation in software engineering. Proficient in python, js, Django and Java. Seeking to raise coding KPIs by providing error-free codes. Ability to translate business requirements into innovative software solutions. Excellent teamwork, interpersonal and communication skills. Looking to start a career as an entry-level professional with a reputed IT company.

KEY SKILLS

Python JavaScript React JS Mongo DB HTML 5 CSS 3 Django Java DSA using C++ My Sql Linux

PROJECTS

1. Django Based Quiz application with User authentication

Crafting a dynamic Django-based Quiz application with robust user authentication. Users register securely, gaining access to personalized profiles. Admins manage quizzes, questions, and user data via an intuitive dashboard. Features include multiple-choice questions, score tracking, and interactive feedback. Utilizing Django's ORM for database management ensures efficient data storage and retrieval. The application prioritizes user experience, offering seamless navigation and responsive design. Implementing Django's built-in security features safeguards user information. This project aims to provide an engaging and secure platform for quiz enthusiasts to test their knowledge.

2. Text To Speech converter website

Creating a Text-To-Speech converter website using HTML, CSS, and JavaScript. Users input text into a form, triggering JavaScript to convert it into speech using Web Speech API. CSS styling ensures a visually appealing interface with responsive design for various devices. Users can customize speech parameters like voice and rate. The website prioritizes simplicity and accessibility, offering a seamless experience for converting text to speech directly in the browser.

3. Food delivery website

Developing a dynamic food delivery website using HTML, CSS, and JavaScript. Users browse a variety of cuisines, selecting dishes and adding them to their cart. Interactive features allow users to customize orders and specify delivery details. JavaScript handles cart functionality, ensuring smooth order management. CSS provides an appealing layout with responsive design for optimal viewing on different devices. Secure payment processing and user authentication enhance the website's functionality and security. This project aims to provide a seamless online food ordering experience for users.

EDUCATION

Bachelors of Engineering

May '20 - May '24

Parala Maharaja Engineering College

Berhampur,Odisha

Bachelors of Engineering in Mechanical Engineering 7.6 /10 SGPA

12th

Sep '18 - Jun '20

Royal College Of Science & Technology

Bhubaneswar,Odisha

Intermediate in Science 363/600 Marks

10th

Sep '17 - Jun '18

Shree Sarasswathi Vidhyaah Mandheer,Kulakaijanga

Jagatsingpur,Odisha

Matriculation 450/600 Marks

Soft Skills

- 10 finger typing with 50 wpm
- Leadership
- Problem solving
- Time management

Achievements

- HackerRank DSA -2222
- StudySection HTML Test 721 Rank
- StudySection Python Test 2237 Rank
