

ACADEMIC DETAILS

QUALIFICATION	INSTITUTE
BCA(Bachelor of computer application)	DRIEMS SCHOOL OF PROFESSIONAL STADIES, TANGI CUTTACK
Class XII (Bihar School Examination Board)	R.S.B INTER SCHOOL, SAMASTIPUR
Class X (Bihar School Examination Board)	M. K. J. High School, Hayaghat

WORK EXPERIENCE

- Full Stack Developer, TECHAVIA IT SOLUTIONS Pvt. Ltd.

(Aug'2023 - Present)
- Web Development:

Built and deployed scalable web applications using Python Django for backend development.

Integrated third-party APIs such as **Delhivery**, **OnePartners**, **Shiprocket**, and other e-commerce services to enable seamless logistics and order management solutions

Designed and implemented **Django REST APIs** for seamless data exchange across platforms.
- Cloud Deployment:

Managed manual deployment of Django applications on **AWS EC2** instances, ensuring scalability and availability.

Implemented basic CI/CD pipelines to streamline deployment workflows.
- Current Project – Custom Software Development:
- Central Horticultural Experiment Station (CHES):

Designing and developing a role-based platform to support three user roles:

Rooftop Gardeners: Enabling user registration and management for gardening services.

Vendors: Managing registration and material supply.

Service Providers: Offering and managing gardening-related services.

Ensuring secure backend development with **Django** and optimizing database interactions using **PostgreSQL**.
- E-commerce Solutions:

Developed and maintained e-commerce functionalities, including payment gateways, inventory management, and order tracking.

PROJECTS

- Central Horticultural Experiment Station (Current Project)

Project Overview:

* Developed a comprehensive platform for managing and facilitating rooftop gardening initiatives.

Implemented three distinct user roles:

* Rooftop Gardeners: Streamlined user registration and management for individuals interested in rooftop gardening services:

* Vendors: Enabled vendor registration and management to supply gardening materials and equipment.

* Service Providers: Developed features for service providers to register and offer gardening-related services.

Key Features:

* **User Authentication:** Designed and implemented secure user authentication and authorization mechanisms using Python Django.

* **Role-Based Functionality:** Customized the platform's features and interfaces according to user roles, ensuring an intuitive user experience.

* **Front-End Development:** Created responsive and user-friendly interfaces using HTML, CSS, and JavaScript.

* **Database Management:** Utilized PostgreSQL for efficient data storage, retrieval, and management.

* **Backend Development:** Built a robust server-side application using Python Django to handle business logic and database operations.

SLE Ayurvedic Project (<https://www.sleayurvedic.com/>)

Project Overview:

* Implemented robust user authentication and authorization mechanisms using Python and Django. Ensured secure access to the platform with user login, registration, and role-based permissions.

* Developed and integrated investment functionalities allowing users to invest in various Ayurvedic plans. Enabled users to manage their investments, view returns, and track investment performance.

- Fashion Fest Project (<https://treeranga.com/>)

Project Overview:

- * Implemented secure user authentication and authorization mechanisms using Python and Django. Provided features for user registration, login, and role-based access control
- * **Developed and maintained e-commerce functionalities, including payment gateways, inventory management, and order tracking.**

- Swastik Wealthcare Project (<https://swastikwealthcare.com/>)

Project Overview:

- * Developed and integrated an investment wallet to allow users to manage their investments. Enabled features for adding funds, viewing investment history, and tracking returns.

TECHNICAL SKILLS

- **Backend:** Python-Django framework
- **Frontend:** HTML, CSS, JavaScript
- **API Development:** Django REST API
- **Database Management:** PostgreSQL
- **DevOps:** Basic knowledge of AWS S3, EC2
- **Version Control:** GitHub
- **Tools:** Postman
