Projects

Project Name: Paikaray Real Estates

🌐 [Website](#)

Description: Designed and developed a dynamic real estate website using WordPress, HTML, CSS, and jQuery. Leveraged a combination of custom coding and popular WordPress plugins to achieve desired functionality and aesthetic appeal.

Key Technologies Utilized:

- WordPress: Utilized as the content management system (CMS) for easy content updating and management.
- HTML & CSS: Hand-coded responsive front-end design for seamless user experience across devices.
- jQuery: Implemented interactive features and dynamic content manipulation to enhance user engagement.

Project Name: OmniscientMedicare

🌐 [Website](#)

Description: OmniscientMedicare is a WordPress-based healthcare platform developed using HTML, CSS, and jQuery. I utilized plugins such as Forminator, Elementskit, Elementor, and WooCommerce to enhance functionality.

Achievements:

- Designed responsive UI/UX.
- Integrated Forminator for custom forms.
- Utilized Elementor for dynamic page layouts.
- Implemented WooCommerce for e-commerce functionality.
- Successfully launched, contributing to healthcare accessibility and efficiency.

Project Name: Mochaibar

 [Website](#)

Description: Developed a user-friendly website for Mochaibar café using WordPress, HTML, CSS, and jQuery. Integrated dynamic features, optimized for SEO, and collaborated with stakeholders to ensure client satisfaction.

Technologies Used:

- WordPress
- HTML
- CSS
- jQuery

Outcome: Successfully launched Mochaibar's website, showcasing expertise in web development and delivering a tailored solution that met client requirements.
