Professional Summary

Dynamic Backend Developer with over 3+ years of experience in software development, proficient in building robust APIs and optimising database performance. Expertise in Python and Django, utilising Django REST Framework to create scalable applications and implement secure user authentication. Demonstrated ability to efficiently manage deployment processes and enhance system functionality through innovative solutions. Passionate about leveraging technical skills to drive impactful results in challenging projects across various industries.

Technical Skills

- **Programming Languages & Frameworks:** Python, Django, Django REST Framework, HTML5, CSS, JavaScript
- **Databases & Querying:** MySQL, PostgreSQL, SQL (Joins, Aggregations, Query Optimisation, Rollback)
- **Libraries/Tools:** Numpy, Matplotlib, Pandas
- **Testing/Automation:** Selenium, Postman, Thunder Client
- **Cloud & DevOps:** AWS, Docker (Basic)
- **APIs & Data Integration:** RESTful APIs, JSON, Scraping, XML (for financial data extraction)
- **Productivity Tools:** Microsoft Office Suite, Google Workspace
- **Soft Skills:** Analytical Thinking, Attention to Detail, Problem Solving, Team Collaboration

Professional Experience

Python, Django Developer (Backend Developer)

SS Associates Innovation Lab Pvt Ltd, Bhubaneswar | Jun 2022 – Present

- Developed and maintained deployment APIs for multiple modules using Django REST Framework.
 - Implemented secure user authentication with JWT and optimized database queries for performance.
 - Integrated payment gateways including Razorpay and managed subscription payments.
 - Utilized Celery and Redis for task management and asynchronous processing.
- Enhanced system functionality through innovative solutions and custom versioning control.

Backend Developer(Internship)

Software Developer at VGO Rides, | Nov 2021 – Jun 2022

- Developed and optimised token-based APIs in Angular for user authentication and application security.
- Collaborated on real-time projects across multiple industries, enhancing software functionality.
- Implemented best practices in database management using MySQL and PostgreSQL.
- Streamlined deployment processes to ensure efficient application delivery.
- Engaged in continuous learning to adopt emerging technologies and methodologies.
- Implement security best practices, including role-based access control, API authentication, and data protection.
- Manage and support data migration and integration tasks while ensuring minimal downtime and high data accuracy.
- Perform routine maintenance tasks such as log monitoring, performance tuning, and database backup coordination.
- Maintain comprehensive technical documentation for backend logic, APIs, and deployment procedures.

PROJECT'S

Dambaruu [<https://market.dambaru.org/dashboard>], Cuttack, September 2023

Responsibilities

- I have implemented **CRUD** operations with a RESTful APIs using Django REST framework. Managed Multiple **MySQL** databases.
- Used **JWT** authentication, library used simplejwt.
- App uses games for kids, managed crud operation using Django Rest Framework.
- Continuous integration on the server and offline device, user login in to the local device and chooses session content after submitting data, all data is posted in the local device.
- Payment gateway implemented using Razorpay.
- Performed **unit testing** to ensure reliability and maintainability of APIs and business logic.

Freelance [<http://qrmetals.com/>], Cuttack, January 2025 – April 2025

Responsibilities

- Used Django authorization and authentication user management.
- Uploaded Excel data saved to MySQL database.
- These data are further used for CRUD operations.
- Front-end designed in HTML, CSS, and JavaScript.
- For the CRUD API using Django template language and Form API.

Freelance (<https://www.drdeepakkumarparida.com/>), Cuttack, June 2025 – August 2025

Responsibilities

- Front-end designed in HTML, CSS, and JavaScript.
- User management using the Django default.
- Email using Django email back-end.
- Dynamically created SEO through Django form API.
- Created Conversion tool, data exported to Excel and VCF contact file format. Using

- openpyexcel library.
- And imported data into the database through Excel.
- And project manage through GitHub and CI/CD with Git Actions. Deployed in Digital Ocean.

BBB Business Data Scraper (Django Web Application)

- Designed a Django MVT-based web application for managing scraping tasks.
- Implemented BeautifulSoup for parsing and extracting BBB business data (name, address, category, ratings, contact details).
- Used Python multithreading to speed up large-scale scraping operations.
- Created template-based UI to start, monitor, and manage scraping jobs.
- Stored scraped data efficiently in a MySQL database.
- Handled error handling, retries, and data validation during scraping.
- Optimized scraping performance and reduced execution time significantly.
- Followed ethical scraping practices with request throttling.

Education

Master of Computer Applications (MCA)

College: Ramchandra Chandravansi University(RCU) | July 2021 – April 2023

Data Science Certified

|January 2024 – August 2024

<https://www.cloudydata.in/>

Key Achievements & Reward

- Successfully delivered **4+ end-to-end projects** across web development and API-based solutions, meeting strict deadlines and exceeding quality expectations.
- Recognized for **exceptional problem-solving ability** in optimizing database queries, resulting in a **30% improvement in API performance**.
- Awarded **Best Team Contributor** for collaborative efforts in a cross-functional project involving backend, frontend, and deployment teams.
- Implemented **Docker-based deployment pipelines** that reduced setup time by 50% for development environments.
- Developed **innovative educational game applications** for children, improving user engagement and learning outcomes.
- Earned client appreciation for **custom API integrations** with AWS S3 and DigitalOcean Spaces.
