

SUMMARY

Backend-focused developer with strong core PHP knowledge and hands-on experience in Laravel and WordPress custom development. Completed a 6-month internship working on real-world web applications. Skilled in backend logic, database handling, RESTful features, and full-stack collaboration. Passionate about learning and building scalable, maintainable solutions.

EDUCATION

Chitalo Degree Maha Vidyalaya

Bachelor's of Computer Application
2021 – 2024

Einstein Academy of Technology and Management

Master's of Computer Application
2024 – 2026

TECHNICAL SKILLS

- Backend: PHP, Laravel, REST APIs
- Frontend: HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX
- Databases: MySQL, PostgreSQL
- WordPress: Custom Themes, Custom Plugins, Hooks, CPT
- Tools: Git, GitHub, VS Code, Postman
- AI Tools: ChatGPT (AI-assisted development & debugging)

SOFT SKILLS

- Problem-Solving & Logical Thinking
- Clear Communication
- Ability to Learn Quickly
- Adaptability & Flexibility
- Attention to Detail
- Time Management
- Team Collaboration
- Ownership & Responsibility

PROFESSIONAL EXPERIENCE

Full Stack Intern

Bisanj Technology (Drophello) | Jun–Nov (2025)

- Worked on a SaaS-based web application focused on automating business communication and backend workflows.
- Contributed to backend feature development using Laravel, React handling application logic and data processing.
- Assisted in building and integrating RESTful APIs and managing database interactions.
- Worked on background task handling and feature-level debugging to support scalable application behavior.
- Gained exposure to real production code, understanding SaaS workflows such as user management, data handling, and feature iteration.
- Also worked with WordPress, developing custom themes and plugins for client-specific requirements.
- Collaborated with senior developers to understand requirements, fix issues, and improve application stability.

PROJECTS

CRM System

- Designed and developed a CRM (Customer Relationship Management) system to manage business contacts, leads, and sales workflows.
- Implemented core modules including Contacts, Leads, Pipelines, and Stages to track customer progress through different sales phases.
- Built pipeline-based lead management with stage categorization for open, won, and lost deals.
- Added features such as activity tracking, notes, and task management to support day-to-day sales operations.
- Implemented bulk data import functionality to handle large contact and lead datasets efficiently.
- Focused on clean backend logic, structured data flow, and maintainable code.
- Developed a responsive user interface using standard frontend technologies for ease of use.

Tech Stack: PHP, Laravel, MySQL, inertia.js, React
