SUMMARY

I am a dedicated and skilled software developer with hands-on experience in full-stack development. Specializing in JavaScript frameworks and libraries, I have successfully developed and deployed several applications focusing on user experience, security, and performance optimization. With a solid educational background in computer applications and sciences, I am committed to contributing to organizational success while continuously advancing my technical expertise. Passionate about staying updated with emerging trends in the IT sector, I aim to leverage my technical, database, and management skills to drive growth and innovation in a reputable organization.

PROJECTS

QuickNotes Application [Link](#)

Mar '24

- Designed an intuitive user interface with ReactJS to facilitate seamless note-taking and management.
- Implemented backend functionalities using ExpressJS, ensuring efficient handling of HTTP requests and responses.
- Leveraged MongoDB for secure user authentication using JWT tokens, enhancing data security.
- Addressed scalability concerns by utilizing MongoDB's flexible document-oriented data model.
- Ensured application security through JWT-based user authentication mechanisms.
- Employed efficient error handling and logging strategies to troubleshoot issues effectively.
- Thoroughly tested the application to guarantee reliability and stability, employing unit tests, integration tests, and end-to-end tests.

Text Craft Application [Link](#)

Apr '24

- Implemented functionality to convert text to uppercase and lowercase, providing users with flexibility in text formatting.
- Designed a feature to remove extra spaces from the input text, enhancing readability and clarity.
- Included a word and character count feature, allowing users to analyze the content's length and structure.
- Developed a user-friendly interface for seamless text manipulation, ensuring a smooth user experience.
- Tested the application thoroughly to ensure accuracy and reliability in text transformation and analysis.

Newsify Application [Link](#)

Jan '24

- Designed an intuitive user interface using ReactJs, ensuring ease of navigation and accessibility to news content.
- Integrated multiple news APIs to provide a diverse range of news articles and headlines, catering to various interests and preferences.
- Implemented features such as search functionality, categorization by topic or source, and personalized news feeds for user customization.
- Ensured data security and privacy through robust authentication mechanisms and secure data handling practices.
- Optimized performance through efficient data fetching and caching strategies, enabling fast and responsive news browsing.
- Conducted thorough testing to validate functionality, performance, and compatibility across different devices and browsers.

SKILLS

Programming Languages JavaScript, HTML, CSS

Technologies & Tools JSON Web Token (JWT), API, ExpressJs, MySQL, MongoDB, React.js, Bootstrap (Front-End Framework)

Data Management Data Security, Logging (Construction)

User Interface User Interface

Development Frameworks React.js (Web Framework)

version control Git, Github

EDUCATION

Master of Computer Application in Master of Computer Science, ITER, S'O'A University

Jan '21 — Jan '23
Bhubaneswar, India

(GPA: 7.01 CGPA)

Bachelor of Science in Bachelor of Science, S.R College , F.M University (GPA: 6.01 CGPA)

Jan '18 — Jan '21
Balasore, India
