Tailwind

Express.js

## PROJECTS

### Gmi Texas V2 (09/2023 - 04/2024)

- Spearheaded the development of a comprehensive construction management platform designed to streamline project oversight and operational efficiency. The solution included both a responsive website and an intuitive iOS application.
- Enabled users to access detailed building blueprints on a per-level basis. Integrated functionality for users to add annotations and markups directly on the blueprints, facilitating better communication and planning.
- Included a robust billing module that allowed users to track construction expenses and manage workers' wages, ensuring transparency and control over financial aspects.
- React.js and Node.js for the website, React Native and Django for the iOS app has been used.

### Real-Estate Property Listing (07/2023 - 09/2023)

- Developed a sophisticated real estate platform aimed at facilitating the buying and selling of properties with comprehensive details and streamlined user interactions.
- Allowed property listings with extensive information including property type, location, size, amenities, and pricing, making it easier for potential buyers to find suitable properties.
- Used Node.js and React.js for building the website.

### Nanoshel (02/2023 - 07/2023)

- Developed a chemical selling website offering a wide array of solid and liquid as well as powdered chemicals.
- Orchestrated backend development using Node.js and MySQL and frontend development with React.js.
