Work Experience

Anyhow Infosystem OPC Private Limited

Dec 2023 – Aug 2024

- **Project:** E-commerce Application
- **Responsibilities:**
 - Developed and maintained a full stack e-commerce application, ensuring the integration of backend services with frontend functionalities.
 - Implemented Spring Security to safeguard user data and maintain application integrity, applying best practices for authentication and authorization.
 - Focused on application stability and performance, delivering a seamless and responsive user interface experience.
- **Technologies Used:** **Backend:** Java Spring Boot (Version 17.0.12), **Frontend:** ReactJS (Version 18.3.1), **Database:** MySQL

Associate Analyst

March 2022 – Dec 2023

GlobalLogic

- **Project:** AVMS (Audio Visual Management System)
- **Responsibilities:**
 - My responsibility was to analyze the data and to authenticate users to access the data.
 - Implemented and managed age verification systems to ensure compliance with regulatory requirements for age-gated content distribution
 - Need to disable accounts for pornography content and restrict access permissions for sanctioned countries.

PROJECTS

- **Architect Design Company Website (Yatharth Architect):** ReactJS, Spring Boot, HTML, Tailwind CSS, JS [GitHub Link](#)
 - **Project Overview:** Developed a dynamic website for a construction and architectural firm showcasing a range of services provided by the company.
 - **Features**
 - **Service Listings:** Displayed a comprehensive list of services offered by the company.
 - **Contact and Registration:** Users can contact the company either by registering their email address or using a contact page form.
 - **User Ratings:** Enabled registered users to rate the company. Unregistered users must register before they can submit a rating.
 - **Admin Panel:** Implemented an admin panel where administrators can view and manage all details. After logging in, admins can:
 - **View Details:** Access all user and service details.
 - **Manage Content:** Add, update, or remove service details and user information.
 - **Deployment:**
 - **AWS Services:** Utilized AWS for backend services.
 - **RDS (Relational Database Service):** Employed for database management.
 - **EC2 (Elastic Compute Cloud):** Used for hosting the environment.
 - **Ubuntu:** Deployed as the operating system for the environment.
