COURSEWORK

UNDERGRADUATE

- Data Structures And Algorithm
- Algorithm Design And Analysis
- Object Oriented Programming
- Database Management System
- Operating System
- Computer Network

SKILLS

PROGRAMMING

C++ • Python • Javascript

DEVELOPMENT

Django • HTML/CSS • React.js • Next.js
• AWS • Bootstrap

DATABASES

SQL • DynamoDb • MongoDB • Redis

OTHERS

Git • System Design

SOFT SKILLS

Leader • Public Speaker • Volunteer

HOBBIES

Playing Games • Reading tech blogs

EXPERIENCE

GEEKSFORGEEKS | SOFTWARE DEVELOPER

July 2022 - Present | Noida, India

- Engineered multiple dashboards and a versatile table structure, streamlining new dashboard creation.
- Automated data updates using cron jobs, managed user email alerts for streaks, enhancing engagement.
- Optimized API performance through code refactoring, contributed significantly to high-profile projects, consistently praised for dedication.

GEEKSFORGEEKS | SOFTWARE DEVELOPMENT INTERNSHIP

April 2022 - June 2022 | Noida, India

- Developed code format for their problem dashboard.
- Found and fixed a bug in contest API, where the user can see the solutions to the problem during an ongoing contest.
- Decrease AWS S3 cost by implementing lifecycle.
- Migrated code from PHP to Django.

AIRTH | SOFTWARE DEVELOPMENT INTERNSHIP

June 2020 - Aug 2020 | Virtual, India

- Constructed a web module for an online air purifier company.
- Created a login portal for the management team and implemented addition, removal, searching, updation operations for Admin panel.
- Used web development tools- Django, HTML/CSS, Bootstrap.

PROJECTS

JOB PORTAL

- Launched job portal for recruiters, enabling job listings and candidate hiring.
- Integrated customizable online assessments for applicants, easing recruiter evaluation.
- Simplified recruiter workflow with a candidate dashboard for efficient selection.

SPRINT

- Engineered a dynamic Sprint function for personalized DSA problem-solving. Integrated timer functionality for time-bound challenges.
- Implemented sharing capabilities for users to share and follow custom Sprints, fostering collaboration in problem-solving.
- Prioritized intuitive interface design, incorporating user feedback for continuous improvement.

HACKATHON

- Developed an Add/Edit Hackathon Dashboard enabling creation, updates, and display on dedicated pages
- Utilized by Google for the "Solving for India" event with 100+ participating universities.
- Implemented team creation, invitation functionalities, facilitating collaboration among participants for project submissions.
