Objective

To enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges

Experience

- Raygain Technologies** 01/06/2023 - Continuing
Python Web Developer
Dedicated web developer with expertise in Python and Django. I have a strong passion for crafting efficient, maintainable code and delivering high-quality web applications. My experience includes developing dynamic, database-driven websites and web applications, as well as collaborating with cross-functional teams to achieve project goals. I am committed to staying updated with the latest technologies and best practices in web development to continuously improve my skills and contribute effectively to project success
- Seeree Consultancy Pvt. Ltd.** 01/08/2022 – 31/05/2023
Python Intern
The web tool is an attendance management system for teachers, employing a facial recognition algorithm to identify individual students. It was built using Django (Python-based web framework) to handle backend operations, while HTML, CSS, and JavaScript were used for the user interface and interactivity, AJAX and jQuery ensure seamless communication with the server, enabling real-time updates. Data is stored securely in MySQL, a relational database management system. This combination of technologies creates an innovative solution to streamline attendance-taking in educational environments
- YOURSOwn** 10/02/2021 – 28/04/2021
Intern
I have done Internship at YoursOwn on "AI based expense tracker app using Speechly, Context API and Local Storage" consisted of Vanilla JS, Node JS, React, Redux, React Router, Axios, Express JS, Mongo DB Modules

Certifications

- SAP Certified Development Associate – ABAP with SAP NetWeaver 7.50
- Training on Python at Lakshya Institute of Technology, Bhubaneswar
- SMART ATTENDANCE SYSTEM using Django at Seeree Consultancy Pvt. Ltd.
- Internship in React.js by doing a project “ AI based expense tracker app using Speechly, Context API and Local Storage” in a company named **YoursOwn**

Education

- **Odisha University of Technology and Research** 2023
Masters of technology (Information Technology)
CGPA: 7.16
- **College of IT and Management Education, Bhubaneswar** 2021
Master in Computer Application
CGPA: 8.94
- **Trident Academy of Creative technology, BBSR** 2019
Bachelor in Computer Application
CGPA: 7.19
- **D R Nayapalli College, Bhubaneswar** 2016
+2 Science
Percentage: 47.66
- **Saraswati Vidya mandir, Fakir Mohan Nagar, BBSR** 2014
10TH
Percentage: 63.16

Skills

- I have knowledge in Python programming language. Also have good knowledge in HTML,CSS, JAVASCRIPT with Django.
- I have also knowledge in React that is a popular JavaScript library for building user interfaces, widely used in web development. With my React expertise, I can create interactive and dynamic web applications efficiently. Whether it's designing reusable components, managing state effectively, or handling UI updates, React skills enable me to build modern, responsive, and user-friendly interfaces. As React continues to evolve and gain traction in the industry, my proficiency in this library positions me as a valuable asset in creating cutting-edge web experiences for users

Projects

- **Smart Attendance System**

I developed an attendance management system for teachers called the web tool, which uses facial recognition to identify students. Built with Django for backend operations, and HTML, CSS, and JavaScript for the user interface. AJAX and jQuery ensure real-time updates. Secure data storage in MySQL. This innovative solution streamlines attendance-taking in educational environments effectively.

- **BLOG APP (08/2020-12/2020)**

-It is a web application where users can post their moments, valuable information or status, etc to blog their blog online

-Tech Stacks used HTML, CSS, JAVASCRIPT, Google Firebase

- **Online Doctor Appointment System (01/2019-04/2019)**

It is web application, where users can schedule their appointments with a specified doctor and doctor can confirm the time. This was done by using HTML, CSS, JDBC, J2EE, Oracle

Languages

- Python
- React.js
- C & C++
- HTML & CSS
- JavaScript
- Node.js
- Java
- SQL
- WordPress
