

# Satya Prakash Sahoo

As a web developer, I am passionate about creating functional and user-friendly web pages that provide an engaging experience for visitors. I am a quick learner and always seeking to expand my knowledge and skills, especially in programming languages and emerging technologies. I believe that technology has the power to make a positive impact on society and improve our daily lives.

## WORK EXPERIENCE

### Web Development Intern Naresh I Technology

02/2023 ,

*Achievements/Tasks*

- Developed basic knowledge in HTML, CSS, Bootstrap, Sass, JavaScript, Nodejs, jQuery, mongo dB ,ExpressJs,and React Js
- Implemented design elements and animations to improve user experience
- Maintained and updated existing websites and resolved any issues that occurs
- Utilized best practices in web design and development to optimize website performance and user experience.

## PROJECTS

### TASK MANAGEMENT TOOL

#### Udemy Verified Project

04/2023

*Tags: Tailwind CSS, React and Redux Toolkit, Express, MongoDB, Nodejs, antd,*

- Designed and developed a professional **TASK MANAGEMENT TOOL** to showcase my work as a web developer By Using MERN stack (MongoDB, Express.js, React, and Node.js) will be utilized.
- User registration with email verification and secure authentication/authorization for ensuring secure access to the application.
- Allow users to create tasks with titles, descriptions, due dates, and priorities, and assign them to team members. Track task progress visually using progress bars or completion percentages. Enable users to update task status.
- Implement automated notifications and reminders for task deadlines and assignments. Allow users to customize their notification preferences.
- Generate task and project status reports using analytics and data visualization. Enable file attachments and management. Optimize for mobile devices.

### EXPENSE TRACKER

#### Udemy Verified Project

06/2023

*Tags: Tailwind CSS, React and Redux Toolkit, Firebase,,maintain UI*

*Bcrypt*

- User Interface (UI): The UI is built using React components. Each component represents a specific

part of the application, such as expense list, expense form, and dashboard.

- Tailwind CSS classes are applied to components to
- Redux Store: The application state, including the expense data, is stored in a Redux store. Components can access and modify the state by dispatching actions.
- Firebase Integration: Firebase is used to handle user authentication and data storage. Users can sign up or log in to the application using Firebase's authentication services.
- Data Fetching and Updating: When the application loads, it can fetch the initial expense data from Firebase and populate the Redux store. As users add or modify expenses, the changes are sent to Firebase.
- As the Redux store is updated with new expense data or changes, the React components subscribed to the relevant parts of the state re-render. This ensures that the UI reflects the latest data and provides a smooth user experience.

## TECHNICAL SKILLS

### Front-end Development:

HTML, CSS, Bootstrap, JavaScript, Sass, jQuery, ReactJS

### Back-end Development:

Express, MongoDB, Node.js

### Additional Tools:

Excel, Word

## ACHIEVEMENTS

Internet Of Things  
Certificate(12/2022)

*NPTEL*

Cloud Computing  
Certificate (12/2022)

*NPTEL*

## EDUCATION

### Master in Computer Application (MCA)

PJ College of Management and  
Technology, Bhubaneswar

*08/2021 - pursuing,*

### Bachelors In ITM

Niis Institution Of Information Science  
And Technology,Bhubaneswar

*06/2017 - 11/2020,*

*7.51 CGPA*

## INTERESTS

Gaming , Fitness,Travelling
