PROJECT DETAILS

Sep 2024 — Present	Priest Designation: Software Developer CMS : WooCommerce Ui Technology uses : HTML Database uses: MySQL On this project i creating a booking of priest by the user. Where the users are searching the priests by their chosen language, selecting state, selecting city etc. I am creating these all functionality by custom code. This project is now on satging mode.
Jul 2024 — Aug 2024	Vapstore Designation: Software Developer CMS : WooCommerce Database uses: MySQL On this website a product can compare the price with different products of different websites. Basically this website works as affiliate marketing. I am creating a plugin where the admin can create a product with basic details and also set the other website url and the same product url from that website. There is another menu on

the admin dashboard like domain products, where admin can manage(add, edit, delete) all the domains, and also check the prices of that domain mapping product prices.

Mar 2024 — Jul 2024

LightfirePrinting

Designation: Software Developer

CMS : WooCommerce

Ui Technology uses : HTML

Database uses: MySQL

On this project a customer can design his own creativity over t-shirt, glass, cup, cap, etc. I am customizing the whole website, where customer can check the different prices of product when he add more quantity. For this type of customization I create a product functionality on the admin panel.
