Career Objective

Result-driven and dedicated professional with 2+ years of experience in the Software Development Life Cycle (SDLC), specializing in designing, developing, and implementing software applications using Python and Django. Proficient in building web applications and RESTful APIs with a strong focus on clean, maintainable, and scalable code. Experienced in leveraging Django frameworks such as Django REST Framework (DRF) for backend development and integrating front-end technologies like HTML, CSS, and JavaScript.

Skilled in database design and management using PostgreSQL and MySQL, and familiar with ORM (Object-Relational Mapping) concepts for efficient data handling. Hands-on experience with version control systems like Git and collaborative tools such as Jira and Confluence. Proficient in writing unit tests and performing debugging to ensure robust and error-free applications.

Demonstrated ability to create functional and technical design documents, write test cases, and perform verification and validation to ensure high-quality deliverables. Experienced in working with Agile methodologies, participating in sprints, and collaborating with cross-functional teams to deliver projects on time. Possess strong communication skills, enabling effective collaboration with team members, stakeholders, and clients.

Education

Nilgiri Degree College

Bachelor of Science

July 2019– July 2022

Baleswar, Odisha, India

Baba Panchalingeswar Higher secondary School

Intermediate

July 2017 – April 2019

Balasore, Odisha, India

Skills & Expertise

- **Operating System** : Windows, Linux
- **Web/ Cloud Technologies** :HTML,CSS, JavaScript, Google Cloud
- **Programming Language** : Python
- **Servers** : WSGI, Template Engines,Django ORM,Gunicorn, Uvicorn, Nginx
- **Frameworks** : Numpy, Pandas, Matplotlib
- **Distributed Technologies** : Web Services (REST)
- **Database and Tools** : SQL, SQLite,mangodb, Excel, Powerpoint, Git,Github
- **Web Frameworks** : Django, Flask, FastAPI
- **IDE** : Pycharm, VSCode, Jupyter Notebook
- **Unit Testing Tool** : pytest
- **Containerization** : Docker

Experience

- **Developer Konect.in** – [Bhubaneswar, Odisha] **July 2022 – 2025**
 - Developed and maintained scalable web applications using **Python**, **Django**, and **Django REST Framework (DRF)**.
 - Collaborated with cross-functional teams to gather requirements, design solutions, and implement features.
 - Optimized database queries and application performance, ensuring high availability and scalability.
 - Containerized applications using **Docker** for consistent deployment across environments.
 - Implemented **CI/CD pipelines** to automate testing and deployment processes.

Projects

- **Project Name** : RunBazaar
- **Role** : Developer
- **Description** : RunBazaar is an e-commerce platform designed to provide a seamless shopping experience for users while enabling efficient management of products, orders, and payments. The platform was developed using Django and Python, with a focus on scalability, performance, and user experience. The application was deployed on Google Cloud Platform (GCP), leveraging cloud services for optimal performance and reliability.

- Designed and implemented **RESTful APIs** using Django REST Framework (DRF) to enable seamless communication between the frontend and backend systems.
- Optimized database queries and implemented caching mechanisms to improve application performance and reduce latency.
- Conducted **code reviews** and ensured adherence to best practices in coding standards, testing, and documentation.
- Resolved critical bugs and performance issues in production, ensuring minimal downtime and a smooth user experience.
- Participated in **Agile ceremonies**, including sprint planning, daily stand-ups, and retrospectives, contributing to the continuous improvement of the development process.
- Mentored junior developers, providing guidance on Django, Python, and GCP best practices, and ensuring the team adhered to established processes.

Highlights:

- Delivered features ahead of schedule, boosting user engagement by **20%**, and implemented a payment gateway, reducing transaction failures by **15%**.
- Recognized for **quick ramp-up and problem-solving skills**, enabling the team to meet tight deadlines without compromising quality.
