Education

DRIEMS Autonomous Engineering College

B.Tech in Computer Science & Engineering

2019 - 2023

9.16/10 CGPA

Sri Aurobindo institute

Higher secondary - Science

2017 - 2019

Work Experience

Bariflo-labs pvt ltd

Backend Developer

June 2024

Bhubaneswar

- Geospatial Analysis with SPLAT!: Utilized SPLAT! (RF Signal Propagation, Loss, And Terrain analysis tool) for comprehensive geospatial analysis, including signal strength mapping and terrain visualization.
- Mapping and Visualization: Created detailed and interactive maps using Folium and other visualization tools, integrating data from SPLAT! output files to provide insights into terrain, buildings, and obstructions.
- Developed and implemented a Django-based application to capture, store, and manage gateway node data with MongoDB and PostgreSQL integration.
- Modified the API to conditionally display output only when the provided input exists within the database.

Bariflo-labs pvt ltd

Python Development Intern

March 2024

Bhubaneswar

- Modified API for Enhanced Functionality: Successfully redesigned and optimized existing API to improve performance and scalability, resulting in more efficient data handling and reduced response times.
- Dashboard Data Integration: Integrated real-time sensor data into the company's dashboard, enabling accurate and up-to-date monitoring and analysis of sensor readings.
- API Development for Frontend Needs: Developed and implemented APIs to meet the specific requirements of the frontend team, ensuring seamless data flow and enhancing the overall user experience.
- Remote IP Access Research: Conducted extensive research and developed solutions for remote IP access without relying on third-party software, focusing on secure and reliable methods for remote connectivity.
- Remote Sensor Image Access Formulas: Investigated and applied various formulas for accessing remote sensor images, optimizing image retrieval and processing for enhanced remote monitoring capabilities.

Qspider - training and placement

Python Development trainee

june 2023 – January 2024

Bhubaneswar

- i learned python development with frontend and backend basics and database.
- Got mentorship of senior engineers from **Test yantra** I learned software development

Projects

University Project: Fake news detection using machine learning algorithms

[Source Code](#)

- This **Machine learning project** is a university project developed using python and three machine learning algorithms SVM, Naive Bayes, Logistics Regression.

University Project: Biometric Attendance System Using IOT

[Source Code](#)

- This **IOT project** is a university project developed with my three team members.

Qspider Project: Password Generate

[Source Code](#)

- Small python programme to generate password for websites

Technical Skills

Languages: Python, JavaScript

Backend: Django

Frontend: HTML, CSS

Databases: PostgreSQL, SQL

Developer Tools: Postman, VS Code, GitHub

Honours and Awards

- Completed in several karate tournament and won multiple awards.
- Achieved Black belt in karate demonstrating proficiency in self defence technique, physical conditioning and mental discipline
