Other Skills: Advance Excel, Data Analysis

Education

Institute of Management and Information Technology, Cuttack | Nov 2022 – June 2024

Masters in Computer Application

Shishu Ananta Mahavidyalaya, Balipatna | June 2019 – July 2022

B.Sc Mathematics

Projects

Hospital Management System(Feb 2024- March 2024):-

- Contributed to a Hospital Management System project, focusing on optimizing administrative workflows and enhancing patient care.
- Collaborated on requirements analysis, system architecture design, and coding.
- Key features included patient registration, appointment scheduling, and user-friendly interfaces for patients.

Spotify Clone(January 2024):-

- Developed a Spotify website clone exclusively with HTML and CSS.
- Replicated layout elements and employed responsive design.
- Customized CSS to emulate Spotify's visual style.

Netflix Clone(Dec 2023):-

- Created a faithful Netflix website clone using HTML and CSS.
- Replicated layout components and implemented responsive design.
- Customized CSS to match Netflix's visual style.

Amazon Website Clone(Nov 2023):-

- Developed a precise clone of the Amazon website using HTML and CSS exclusively.
- Replicated layout elements such as the header, navigation bar, product grid, and footer.
- Employed responsive design principles for compatibility across devices.
- Customized CSS styling to replicate Amazon's appearance, including fonts, colors, and spacing.

Employee API:-

Developed a secure Employee Management REST API using Node.js and Express.js with role-based access control.

- Implemented authentication using JWT and password hashing with bcrypt for secure login and signup functionalities.
- Built CRUD APIs for managing Employees and HR records, including create, read, update, and delete operations.
- Integrated middleware to protect routes and enforce role-based access (Admin, HR, Employee).
- Validated inputs (email, contact, etc.) and implemented structured error handling for robust user experience.
- Used MongoDB with Mongoose for efficient data storage and schema design.
