PROFILE

Experienced software engineer with 3.8 years of hands-on experience, including 1.8 years of professional work and 2 years of internship. Proficient in both backend and frontend development, I have contributed to diverse projects across Cloud Management, Logistics, Entertainment, Healthcare, and E-commerce. Passionate about innovation, I continuously seek opportunities to enhance user experiences through cutting-edge technology.

PROFESSIONAL EXPERIENCE

Full Stack Developer Internship <i>Adixoo</i> ⓘ Worked as a Software Developer Intern at Adixoo on 7+ projects across logistics, eCommerce, and healthcare. Handled full-stack development using C, JavaScript, Node.js, React.js, and SQL. Played a key role in ensuring project success and client satisfaction.	08/2021 – 05/2023 Indore, India
Software Consultant Full Stack <i>Adixoo</i> ⓘ Worked on 5+ diverse projects in logistics, cloud services, and eCommerce. Handled both frontend and backend development using JavaScript, Node.js, React.js, and SQL. Played a key role in delivering quality solutions and ensuring client satisfaction.	05/2023 – 05/2024 Indore, India
Full Stack Developer <i>Alit Technologies</i> ⓘ Spearheaded the frontend development of web applications for CRM and ERP systems, integrating cutting-edge APIs like ChatGPT and DeepL to enhance user interaction while improving system responsiveness by 25% across platforms.	07/2024 – 03/2025 Indore, India

EDUCATION

Bachelor of Technology (Computer Engineering) <i>RGPV University</i>	05/2019 – 05/2023 Indore, India
--	------------------------------------

SKILLS

Programming Languages C, C++, Javascript, Typescript
Framework/Library ReactJs, NodeJs, Angular, ExpressJs, NestJs, NextJs
Databases MySQL, OracleDB, MongoDB, DynamoDB, Postgres, MariaDB
ORM TypeORM, Sequelize, Mongoose
Cloud/Services AWS, Azure Devops
Testing Tool Jest, Chai, Mocha
Control System Git, Github, Gitlab, AWS Code Commit, BigBucket, Azure Devops

PROJECTS

Ametnes

Role: As a full stack developer for the Ametnes project, played a pivotal role in designing and implementing a comprehensive cloud services platform. Leveraging React for frontend development and Express.js for the Backend for Frontend (BFF) layer, spearheaded the development of a user-friendly interface for accessing server resources, storage, and various other services offered by the platform.

Tools/Technologies: React.js, Redux, Express.js, Jest, Gitlab.

Nike - Atonce

Role: Key contributor at Nike as a Fullstack Developer, specializing in frontend and backend development. Led the design and integration efforts for the Order Confirmation Section of the Nike app. Designed user-friendly interfaces and integrated APIs to enhance the user experience. Developed a robust Confirmation Notification service on the backend for seamless communication with users.

Tools/Technologies: Node.js, React.js, Angular.js, AWS Lambda, Jest, Github.

Primerica

Role: Developed the Contact Module as part of the Primarica Project, a comprehensive platform offering insurance, investment, and financial services. The Contact Module facilitates user registration and access management, ensuring seamless interaction between users and the portal.

Tools/Technologies: Node.js, Redux, Nest.js, Jest, Jenkins, Github.

Crowdbotics

Role: As a Frontend Developer at Crowdbotics, Responsible for managing both user and vendor interfaces, integrated UI components to create a seamless dashboard experience. This included developing modules for branding, order management, bidding, quotation handling, and more.

Tools/Technologies: React.js, Redux, Jest, Github.

Spotsaas

Role: Developed an intuitive and responsive frontend for a software discovery platform, enhancing user experience and engagement. Contributed to optimizing software search and recommendation features to simplify business software selection.

Tools/Technologies: Next.js, Github.

Duck Creek

Role: Worked on the architectural principles of the company's in-house CI/CD microservices platform.

Participated actively in creating a system to automate the devOps pipeline processes such as syncing, version bumping, updating versions, deploying, and retrieving deployment statuses etc. Enabled streamlined DevOps operations by allowing these processes to be executed via simple terminal commands.

Tools/Technologies: NodeJS, Typescript, NestJS, Jest, Axios, CommanderJS, Microsoft Azure DevOps.-

ACHIEVEMENTS

- Received Employee of the Year Award for exceptional performance.
- Led cross-functional teams on projects, achieving a significant improvement in project completion time.
